Reading program designed for adults grade 5-adult. Includes answers for activity sheets contained in the Level V Teacher Handbook.

The vital resource for grading all assignments from the Advanced Pre-Med Studies course, which includes: The fascinating history of medicine, providing students with a healthy dose of facts, mini-biographies, and vintage illustrationsInsight into how germs are symptomatic of the literal Fall and Curse of creation as a result of man's sin and the hope we have in the coming of Jesus Christ. OVERVIEW: From surgery to vaccines, man has made great strides in the field of medicine. Quality of life has improved dramatically in the last few decades alone, and the future is bright. But students must not forget that God provided humans with minds and resources to bring about these advances. A biblical perspective of healing and the use of medicine provides the best foundation for treating diseases and injury. The evolutionary worldview can be found filtered through every topic at every age level in our society. It has become the overwhelmingly accepted paradigm for the origins of life as taught in all secular institutions. This dynamic course helps young people not only learn science from a biblical perspective, but also helps them know how to defend their faith in the process. FEATURES: The calendar provides lesson planning with clear objectives, and the worksheets and quizzes are all based on the materials provided for the course.

We want to help you get your best score on the PSAT/NMSQT McGraw-Hill's PSAT/NMSQT gives you the all-important test-taking skills to carry you through the SATs, college exams, and beyond. Designed to develop your command of the eight critical reasoning skills--the very skills the PSAT is constructed to measure--this valuable resource will help you outthink the test and find the right answers even for unfamiliar question types. Written by test-prep experts with years of experience, McGraw-Hill's PSAT/NMSQT explains the test and analyzes all the crucial subject areas it covers--math, critical reading, and vocabulary. It also features 40 top strategies that can help you on test day! McGraw-Hill's PSAT/NMSQT includes: 3 full-length simulated PSATs with fully explained answers in the book and 2 more practice PSATs online Daignostic test to pinpoint your strengths and weaknesses Techniques to develop the essential critical reasoning skills

Concepts of Biogeography & Astronomy Course Description This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student; materials for each semester are independent of one another to allow flexibility. Semester 1: Biogeography It has been said that our planet is really just an insignificant speck in a vast universe, but that's not true! In fact, the conditions for life found on Earth are supremely unique and make our life here comfortable. This despite the reality that the world around us is also tainted and in need of careful calibration to continue. This book opens a window to the spectacular environments found on our planet, from deserts to the tropics. Researcher and biologist Dr. Gary Parker brings his vast knowledge of ecology to a teaching setting, exploring and explaining ecosystems, population growth, habitats, adaptations, energy problems, and much more. Learn about insect control in California, why mammals have fur, and how sharks maintain “friendships” with small fish known as remora. Exploring the World Around You brings the varieties of our planet's habitats alive to the reader. Semester 2: Astronomy Think you know all there is to know about our solar system? You might be surprised at some of the amazing details that you find when you begin Exploring the World of Astronomy! From the rugged surface of the moon to the distant and mysterious constellations, this book provides an exciting educational tour for students of different ages and skill levels. Learn about a blue moon, the 400-year storm on Jupiter, and what is meant by “the zone of life.” Discussion ideas, questions, and research opportunities help expand this great resource on observational astronomy into an unforgettable educational course for middle school to high school students!

Concepts of Earth and Chemistry Course Description This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student; materials for each semester are independent of one another to allow flexibility. Semester 1: Earth Blending a creationism perspective of history with definitions of terms and identification of famous explorers, scientists, etc., this book gives students an excellent initial knowledge of people and places, encouraging them to continue their studies in-depth. Semester 2: Chemistry Chemistry is an amazing branch of science that affects us every day, yet few people realize it, or even give it much thought. Without chemistry, there would be nothing made of plastic, there would be no rubber tires, no tin cans, no televisions, no microwave ovens, or something as simple as wax paper. This book presents an exciting and intriguing tour through the realm of chemistry as each chapter unfolds with facts and stories about the discoveries of discoverers. Find out why pure gold is not used for jewelry or coins. Join Humphry Davy as he made many chemical discoveries, and learn how they shortened his life. See how people in the 1870s could jump over the top of the Washington Monument. Exploring the World of Chemistry brings science to life and is a wonderful learning tool with many illustrations and biographical information.

These resources provide invaluable support within the Key Maths series for all mathematics teachers, whether specialists or non-specialist, experienced or new to the profession.

These resources provide invaluable support within the Key Maths series for all mathematics teachers, whether specialists or non-specialist, experienced or new to the profession.

The Science of Life: Biology Course Description This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student; materials for each semester are independent of one another to allow flexibility. Semester 1: Intro to Science Have you ever wondered about human fossils, “cave men,” skin color, “ape-men,” or why missing links are still missing? Want to discover when T. Rex was small enough to fit in your hand? Or how old dinosaur fossils are-and how we know the age of these bones? Learn how the Bibles’ world view (not evolution’s) unites evidence from science and history into a solid creation foundation for understanding the origin, history, and destiny of life-including yours! In Building Blocks in Science, Gary Parker explores some of the most interesting areas of science: fossils, the errors of evolution, the evidences for creation, all about early man and human origins, dinosaurs, and even “races.” Learn how scientists use evidence in the present, how historians use evidence of the past, and discover the biblical world view, not evolution, that puts the two together in a credible and scientifically-sound way! Semester 2: Life Science Study clear biological answers for how science and Scripture fit together to honor the Creator. Have you ever wondered about such captivating topics as genetics, the roll of natural selection, embryonic development, or DNA and the magnificent origins of life? Within Building Blocks in Life Science you will discover exceptional insights and clarity to patterns of order in living things, including the promise of healing and new birth in Christ. Study numerous ways to refute the evolutionary worldview that life simply evolved by chance over millions of years. The evolutionary worldview can be found filtered through every topic at every age-level in our society. It has become the overwhelmingly accepted paradigm for the origins of life as taught in all secular institutions. This dynamic education resource helps young people not only learn science from a biblical perspective, but also helps them know how to defend their faith in the process .

Teacher Guide for the 36-week, 7th-8th grade science course! The vital resource for grading all assignments from the Intro to Archaeology & Geology course, which includes: Accounts of some of the richest discoveries of the Middle East that demonstrate the accuracy and historicity of the BibleUnique insights of the earth and how our current world was transformed by the great Flood. OVERVIEW: The course takes students on an exciting exploration of history and ancient cultures. They will unearth why broken pottery can tell more than gold or treasure, some of the difficulties in dating ancient artifacts, how the brilliance of ancient cultures demonstrated God’s creation. Information studied includes the Hittites, Babylonians, and Egyptians, the early development of the alphabet and its impact on discovery, the numerous archaeological finds that confirm biblical history, and why the Dead Sea scrolls are considered such a vital breakthrough. Also, in the section on geology, students will learn how sedimentary deposition occurs through water, wind, and ice; effects of erosion; ways in which sediments become sedimentary rock; fossilization and the age of the dinosaurs; the powerful effects of volcanic activity; continental drift theory; radioisotope and carbon dating; and geologic processes of the past. Our planet is a most suitable home. Its practical benefits are also enhanced by the sheer beauty of rolling hills, solitary plains, churning seas and rivers, and majestic mountains - all set in place by processes that are relevant to today’s entire population set here by God’s divine hand. FEATURES: The calendar provides lesson planning with clear objectives, and the worksheets and quizzes are all based on the readings from the two main books.

Developed for the AQA Specification, revised for the new National Curriculum and the new GCSE specifications. The Teacher File contains detailed support and guidance on advanced planning, points of emphasis, key words, notes for non-specialist, useful supplementary ideas and homework sheets.
