A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her Manual for Writers continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, A Manual for Writers of Research Papers, Theses, and Dissertations has been fully revised to meet the needs of today's writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of The Chicago Manual of Style. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, A Manual for Writers remains the essential resource for students and their teachers.

This collection of specially commissioned essays provides the first social history of masculinity in the 'long eighteenth century'. Drawing on diaries, court records and prescriptive literature, it explores the different identities of late Stuart and Georgian men. The heterosexual fop, the homosexual, the polite gentleman, the blackguard, the man of religion, the reader of erotica and the violent aggressor are each examined here, and in the process a new and increasingly important field of historical enquiry is opened up to the non-specialist reader. The book opens with a substantial introduction by the Editors. This provides readers with a detailed context for the chapters which follow. The core of the book is divided into four main parts looking at sociability, virtue and friendship, violence, and sexuality. Within this framework each chapter forms a self-contained unit, with its own methodology, sources and argument. The chapters address issues such as the correlations between masculinity and Protestantism; masculinity, Englishness and taciturnity; and the impact of changing representations of homosexual desire on the social organisation of heterosexuality. Misogyny, James Boswell's self-presentation, the literary and metaphorical representation of the body, the roles of gossip and violence in men's lives, are each addressed in individual chapters. The volume is concluded by a wide-ranging synoptic essay by John Tosh, which sets a new agenda for the history of masculinity. An extensive guide to further reading is also provided. Designed for students, academics and the general reader alike, this collection of essays provides a wide-ranging and accessible framework within which to understand eighteenth-century men. Because of the variety of approaches and conclusions it contains, and because this is the first attempt to bring together a comprehensive set of writings on the social history of eighteenth-century masculinity, this volume does something quite new. It de-centres and problematises the male 'standard' and explores the complex and disparate masculinities enacted by the men of this period. This will be essential reading for anyone interested in eighteenth-century British social history.

For more than 30 years, students and practising electricians have relied on John Whitfield to guide them through the complexities of the Wiring Regulations. Unlike other publications, it does not assume that readers are fully conversant with electrical theory. It assumes just a basic knowledge and introduces technical matter with brief easy-to-understand explanations. His Guide is a recognised brand, has consistently been a bestseller and regarded as THE guide to the Wiring Regulations. This 4th Edition covers Amendment 3:2015, regarded as 'potentially life-saving', which comes into effect July 2015. As in earlier editions, all useful relevant details derived from other IET publications such as Guidance Notes, Wiring Matters, which might otherwise be overlooked by electricians, are included. Importantly the Guide also benefits from the most up-to-date, hands-on expertise provided by the co-author, Andrew Hay-Ellis, whose credentials are second-to-none. He is an established author of vocational electrical books and, amongst other functions, is a Chief Examiner at City & Guilds.

Yves Bonnefoy, celebrated translator and critic, is widely considered the most important and influential French poet since World War II. Named to the College de France in 1981 to fill the chair left vacant by the death of Roland Barthes, Bonnefoy was the first poet honored in this way since Paul Valery. Winner of many awards, including the Prix Goncourt in 1987 and the Hudson Review's Bennett Award in 1988, he is the author of six critically acclaimed books of poetry. Spanning four decades and drawing on all of Bonnefoy's major collections, this selection provides a comprehensive overview of and an ideal introduction to his work. The elegant translations, many of them new, are presented in this dual-language edition alongside the original French. Several significant works appear here in English for the first time, among them, in its entirety, Bonnefoy's 1991 book of verse, *The Beginning and the End of the Snow*, the 1988 prose poem *Where the Arrow Falls*, and an important long poem from 1993, "Wind and Smoke." Together with poems from such classic volumes as "In the Lure of the Threshold", these new works shed light on the growth as well as the continuity of Bonnefoy's work. John Naughton's detailed introduction looks at the evolution of Bonnefoy's poetry from the 1953 publication of "On the Motion and Imobility of Douve", which immediately established his reputation as one of France's leading poets, through the 1993 publication of *The Wandering Life* and its centerpiece "Wind and Smoke." "This is a comprehensive selection that contains examples of work spanning [Bonnefoy's] full career of forty years, from the ground-breaking "Du Mouvement et de l'Immobilité de Douve" through the celebratory "Pierre Ecrite" to the magical winter landscapes of America's East Coast and an unsettling reworking of myth in the recent "La Vie Errante" . . . The translations, which are the work of a variety of hands, including Galway Kinnell, Emily Grosholz and Anthony Rudolf, nevertheless fit well together and all are sensitive to the register and subtleties of both languages, while the introductory essay by John Naughton expertly explains Bonnefoy's importance as a poet and the influences which have shaped him. This is definitely a volume worth having, for layman and French specialist alike."—Hilary Davies, *Times Literary Supplement* "Anyone not familiar with Bonnefoy's work will benefit from the background information and explanations given by John Naughton in his excellent introduction The book as a whole provides an excellent introduction to Bonnefoy's poetry and to his concerns of a lifetime."—Don Rodgers, *Poetry Wales*
