Tessellations, palindromes, tangrams, oh my! Women Who Count: Honoring African American Women Mathematicians is a children's activity book highlighting the lives and work of 29 African American women mathematicians, including Dr. Christine Darden, Mary Jackson, Katherine Johnson, and Dorothy Vaughan from the award-winning book and movie Hidden Figures. Although the book is geared toward children in grades 3-8, it is appropriate for all ages. The book includes portrait sketches and biographies for the featured mathematicians, each followed by elementary-school and middle-school activity pages. Children will enjoy uncovering mathematicians' names in word searches, unscrambling math vocabulary words, solving equations to decode interesting facts, using logical thinking to uncover magic squares, locating hidden objects on an "I Spy" page, and more! They will also read about the important contributions of Drs. Martha Euphemia Lofton Haynes, Evelyn Boyd Granville, and Marjorie Lee Browne, the first three African American women to receive doctoral degrees in mathematics. Other women profiled include contemporary mathematicians who will inspire today's children to become tomorrow's leaders. Women Who Count is a must-read for parents and children alike!

If you're looking for a book that covers all the basic reading skills, you have just found it. They're all here: following directions, sequencing, vocabulary development, getting the main idea, drawing conclusions, and more. All topics are presented in a highly creative manner which requires thinking on the part of your students. We have made the activities highly independent in nature, plus provided you with an answer key.

If you're looking for a book that covers all the basic reading skills, you have just found it. They're all here: following directions, sequencing, vocabulary development, getting the main idea, drawing conclusions, and more. All topics are presented in a highly creative manner which requires thinking on the part of your students. We have made the activities highly independent in nature, plus provided you with an answer key.

Teaches basic skills through the following sports: skateboarding, basketball, baseball, football and cycling.

Teaching Mathematics in Grades 6 - 12 by Randall E. Groth explores how research in mathematics education can inform teaching practice in grades 6-12. The author shows preservice mathematics teachers the value of being a "researcher" constantly experimenting with methods for developing students' mathematical thinking and connecting this research to practices that enhance students' understanding of the material. Ultimately, preservice teachers will gain a deeper understanding of the types of mathematical knowledge students bring to school, and how students' thinking may develop in response to different teaching strategies.
