"Blue Pelican

Java" is a

somewhat unusual

high school

computer science

textbook. Most
computer science
texts will begin
with a section
on the history
of computers
followed with a
flurry of
definitions that
are just "so
many words" to
the average
student. The
approach here is

Download Free

1999 Ford

to first give
the student some
experience upon
which to hang
the definitions
that come later.

The usual
practice of
introducing
classes and
objects is
deferred until
the student has
a firm grasp of

the fundamentals
(loops, decision
structures,

etc). Thus, the
beginning

student is not
overwhelmed by
the simultaneous
introduction of
OOPs and the
fundamentals.

The book
includes plenty
of exercises
