Solving

Solving Systems Of

To solve a system is to find all such common solutions or points of

intersection. Systems of linear equations are a common and applicable

subset of systems of equations. In the case of two variables, these systems can be thought of as lines drawn in two-dimensional space.

Solving

Systems of Equations

Solver: Wolfram|Alpha

Let's solve a couple of examples using

substitution method.

Example 1. Solve the systems of equations

below. $b = a + 2$. $a + b =$

4. Solution. Substitute

the value of b into the

second equation. $a + (a$

$+ 2) = 4$. Now solve for

a . $a + a + 2 = 4$. $2a + 2 =$

4 . $2a = 4 - 2$. $a = 2/2 =$

Solving

Solving systems of linear equations by graphing is a good way to visualize the types of solutions that may result. However, there are many cases where solving a system by graphing is inconvenient or imprecise. If the graphs extend beyond the small grid with x and y both between (-10) and 10 , graphing
