This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of "autonomous driving".

Originally published in hardcover in 2019 by Doubleday.

Find out how effective learning environments can be a solution to the skill development challenges your organization faces in today's global economy. This title includes components of effective learning, implementation strategies, necessary skills to design and orchestrate learning, and ideas for breaking through learning barriers.

This is the first significant publication to explore the output of Matt Keegan, the New York-based artist known for his work across mediums, as well as independent publishing including the acclaimed editioned art journal North Drive Press. This monograph expands on a recent solo exhibition by the artist at Rogaland Kunstcenter, Stavanger, Norway, titled "Portable Document Format." The show was organized as an idiosyncratic retrospective, with Keegan remaking sculptures dating from 2006 to 2015, initially fabricated in Sheetrock and steel, in cardboard. Like the exhibition, the publication serves both as a project and a reference for the artist's work. Essays by Tom McDonough and John Miller theorize Keegan's production, while interviews with Sara VanDerBeek and Anna Craycroft underscore the artist's ongoing engagement with his peer group. Furthered by contributions from colleagues Uri Aran, Leslie Hewitt and James Richards, situated alongside full-color installation photos and reproductions of work from the past decade, Matt Keegan: OR provides a solid introduction and layered overview of the artist's multifarious practice.

This book reflects the shift in design paradigm in automobile industry. It presents future innovations, often referred as "automotive systems engineering". These cause fundamental innovations in the field of driver assistance systems and electro-mobility as well as fundamental changes in the architecture of the vehicles. New driving functionalities can only be realized if the software programs of multiple electronic control units work together correctly. This volume presents the new and innovative methods which are mandatory to master the complexity of the vehicle of the future.

Samantha Sinclair will never trust another man, but her friends decide to lure her out of her celibacy with a special Christmas gift-a night with a sensualator. John-Kuno is no ordinary man. He takes Sam away from her fears, her homogenized, synthesized existence and introduces her to the enigmatic, sensual world of the shifters. With their starlight passion burning brighter than a supernova, John and Sam do not know that in the cold reaches of space a monster is biding his time. He demands nothing less than the universe as his due, starting with Sam, but first he must destroy John and the whole race of humans and their shifter allies.

Make 2019 your best year by planning ahead! This personal planner diary is your must-have organizer for all your daily tasks, appointments and events. Each of the cute daily spreads starts from January to December and includes plenty of space to write your daily schedule as well as a to-do list, priorities and notes. Use this daily organizer in your offices, schools, classes, homes and more to get yourself organized and ready for a new day. A well planned day makes a better organized life ready to achieve more goals so what are you waiting for? Makes a great gift idea for moms, planners, colleagues, teachers, students, friends and family. PRODUCT DETAILS: Yearly calendar overview Daily pages to record tasks, appointments and notes Dimensions: 8" x 10" (20.32cm x 25.4cm) Premium matte finish soft cover and perfect bound glued spine. Printed on high quality 60# interior stock
