Are you thinking about studying in the United States? This book is your ultimate guide to finding your dream college. Whether you've dreamed of studying literature on a grassy quad, learning economics in the heart of a bustling city, or earning your engineering degree on a sunny beach, this book will help you find exactly what you are looking for. This is the only guide made specifically for international students wishing to pursue their undergraduate studies in the United States. Inside you'll find: -A step-by-step guide to building your personalized college list -176 profiles of America's top colleges and universities -A breakdown of colleges by type, culture, selectivity, and more -Quizzes to help you figure out your college preferences -A guide to different parts of the United States -Expert admissions advice on writing a standout application to the nation's most elite colleges -Tips on how to secure financial aid as a non-US citizen If you are considering school in the United States, The International Student's Guide to American Colleges should be your first stop. By the time you finish, you'll be ready to conquer your college search head on!

Grad's Guide to Graduate Admissions Essays provides more than 50 successful admissions essays straight from the source—recent college graduates making the transition to earning advanced degrees at highly selective graduate programs. Harvard, Columbia, Stanford, and Northwestern are just a few of the universities to which these students were admitted. Each of the essays contains designated segments highlighting the particular characteristics that make them outstanding admissions essays. Additionally, the essays are interspersed with segments labeled “Writer’s Words of Wisdom,” which contain statements from the author of the particular essay with advice on the admissions process. By receiving guidance from successful graduate school applicants, readers can glean advice from a variety of perspectives, while still obtaining the critical information as it relates to well-written essays for programs within a variety of fields including law, business, medicine, education, and humanities.

Since the emergence of climate and global warming onto the international agenda, research in sustainability has been underpinned by the development in energy and environmental science. Highlighted 30 years ago by the Brundtland Commission, 'sustainable development' was defined as: meeting the needs of the present without compromising the ability of future generations to meet their own needs. This has very much defined the scope and aims of this conference.This conference proceedings book contains the selected papers presented in the 2015 International Conference on Sustainable Development (ICSD2015) held in September 25-27, 2015, in Wuhan, Hubei, China. The conference positions itself as an international forum for researchers all over the world to come together to share and discuss their findings and contributions in all aspects of sustainability; including theory, methodology and applications covering a wide spectrum of topics and issues. The conference proceedings put together a total of 119 papers in sustainable development, covering issues in environmental, energy, and economical aspects of the subjects.

Whereas Area Studies and cross-border cooperation research conventionally demarcates groups of people by geographical boundaries, individuals might in fact feel more connected by shared values and principles than by conventional spatial dimensions. Knowledge Production, Area Studies and Global Cooperation asks what norms and principles lead to the creation of knowledge about cross-border cooperation and connection. It studies why theories, methods, and concepts originate in one place rather than another, how they travel, and what position the scholar adopts while doing research, particularly ‘in the field’. Taking case studies from Asia, the Middle East and North Africa, the book links the production of alternative epistemologies to the notion of global cooperation and reassesses the ways in which the concept of connectedness can be applied at the translocal and individual rather than the formal international and collective level. Knowledge Production, Area Studies and Global Cooperation provides an innovative and critical approach towards established means of producing knowledge about different areas of the world, demonstrating that an understanding of pluri-local connectivity should be integrated into the production of knowledge about different areas of the world and the behavioural dimension of global cooperation. By shifting the view from the collective to the individual and from the formal to often invisible patterns of connectedness, this book provides an important fresh perspective which will be of interest to scholars and students of Area Studies, Politics, International Relations and Development Studies.

This book consists of one hundred and seventeen selected papers presented at the 2015 International Conference on Electronics, Electrical Engineering and Information Science (EEEIS2015), which was held in Guangzhou, China, during August 07-09, 2015. EEEIS2015 provided an excellent international exchange platform for researchers to share their knowledge and results and to explore new areas of research and development. Global researchers and practitioners will find coverage of topics involving Electronics Engineering, Electrical Engineering, Computer Science, Technology for Road Traffic, Mechanical Engineering, Materials Science and Engineering Management. Experts in these fields contributed to the collection of research results and development activities. This book will be a valuable reference for researchers working in the field of Electronics, Electrical Engineering and Information Science. Contents: Electronics EngineeringElectrical EngineeringComputer Science and ApplicationTechnology for Road TrafficMechanical EngineeringMaterial Science and Material Processing TechnologyEngineering Management Readership: Researchers working in the field of Electronics, Electrical Engineering and Information Science.

Clear, comprehensive guidance toward the global infrastructure investment market Infrastructure As An Asset Class is the leading infrastructure investment guide, with comprehensive coverage and in-depth expert insight. This new second edition has been fully updated to reflect the current state of the global infrastructure market, its sector and capital requirements, and provides a valuable overview of the knowledge base required to enter the market securely. Step-by-step guidance walks you through individual infrastructure assets, emphasizing project financing structures, risk analysis, instruments to help you understand the mechanics of this complex, but potentially rewarding, market. New chapters explore energy, renewable energy, transmission and sustainability, providing a close analysis of these increasingly lucrative areas. The risk profile of an asset varies depending on stage, sector and country, but the individual structure is most important in determining the risk/return profile. This book provides clear, detailed explanations and invaluable insight from a leading practitioner to give you a solid understanding of the global infrastructure market. Get up to date on the current global infrastructure market Investigate individual infrastructure assets step-by-step Examine illustrative real-world case studies Understand the factors that determine risk/return profiles Infrastructure continues to be an area of global investment growth, both in the developed world and in emerging markets. Conditions continually change, markets shift and new considerations arise; only the most current reference can supply the right information practitioners need to be successful. Infrastructure As An Asset Class provides clear reference based on the current global infrastructure markets, with in-depth analysis and expert guidance toward effective infrastructure investment.

With over 18 years of experience in the education-counseling sector, I have gained an in-depth knowledge of the US, UK, Canadian & Australian college and university systems. Understanding the programs on offer and the unique personalities of each school has enabled me to easily match my students to their ideal schools, which leads to their being happy in college and in consequence exceling academically. During my years spent in India, I became increasingly conscious that not everyone attending high school outside the US had a clear vision of how the admissions process actually works (and to be frank I suspect that many of my students attending high schools in US are equally confused about it). This is why I finally sat down and decided to explain the process in full in a book of this nature. Over the years I have been exceptionally successful in placing numerous students into the 8 US Ivy League schools (Harvard, UPenn, Yale, Princeton, Brown, Columbia, Dartmouth and Cornell), and also into the other top schools in the US (including MIT, Cal Tech, Stanford, Chicago, Northwestern, and Duke). I've also had huge success placing my students in many of the 20 UK Russell group universities (which include Oxford, Cambridge, Warwick, UCL, Imperial, and LSE). One of the key reasons for my success has been my in depth understanding of what each and every college and university is looking for, besides the top grades. I work with my students (from grade 8 up) to help them improve both their academic and extracurricular profiles, so they stand out among all other applicants. This book will help you understand the rules of the game of winning a place at your top choice school. Through it I aim to enable you to significantly improve your chances of winning that coveted place you dream of. I aim to guide you to strategically select the colleges that are looking for students just like you, and to give you an understanding of how the US universities and colleges assess your application and select the candidates that best fit their profile. This is the book for you if - \* You want to maximize your chances of winning a place at the school/s of your dreams \* You want to know why you have to take classes outside your major area of academic or vocational interest at all US Universities \* You want to know which Technical Specialist schools boast the best gender balances \* You need help choosing which colleges/universities to apply to \* You want to know which schools are in the Ivy League and what the Ivy League actually is \* You want to know which schools offer top programs in Engineering or Management at the undergraduate level \* You want to know what Pre-Med and Pre-Law involve \* You want to know what Greek life actually means \* You want to understand how the size of a school will impact your student experience \* You want to know which schools have the best ethnic and international diversity \* You want to know how US schools assess applicants \* You want to know how to write a winning application essay \* You want to know how to make your application stand out \* You want to know about the SAT and the ACT \* You want to understand the application options like ED \* You need help to ace your college interview \* You want to know about Merit Scholarships \* You want to know about Need-Based Financial Aid

Many enterprises are moving their applications and IT services to the cloud. Better risk management results in fewer operational surprises and failures, greater stakeholder confidence and reduced regulatory concerns; proactive risk management maximizes the likelihood that an enterprise's objectives will be achieved, thereby enabling organizational success. This work methodically considers the risks and opportunities that an enterprise taking their applications or services onto the cloud must consider to obtain the cost reductions and service velocity improvements they desire without suffering the consequences of unacceptable user service quality.
