This Handbook offers an analysis of the relation between football and politics, based on over 30 case studies covering five continents. It provides a detailed picture of this relation in a wide number of European, American, African, and Asian states, as well as a comparative assessment of football in a global perspective, thus combining the general and the local. It examines themes such as the political origins of football in the studied country, the historical club rivalries, the political aspects of football as a sports spectacle, and the contemporary issues linked to the political use of football. By following the same structure with each study, the volume allows for the comparison between largely investigated cases and cases that have seldom been addressed. The Handbook will be of use particularly to students and scholars in the fields of sport studies, political science and sociology, as well as cultural studies, anthropology and leisure studies.

This book explores various aspects of intranational elite football in Africa, drawing on the expertise of notable scholars from across the world. Africa ' s Elite Football focuses on an area largely ignored by current scholarship on African football, where interest has focused on international migration. In exploring the intranational, the book is written in two parts. The first is a general focus on the continent, and the second is an examination of country cases. The general focus of the book is on the nature of elite tier leagues, the relationship between politics and football, the media, youth academies, intranational migration and fans. Notably, chapters on topics such as intranational migration present groundbreaking scholarship in this area. Currently, football discourses on migration focus on international migration of footballers, yet the majority of migration in African football is intranational. Thus, by addressing the intranational, this book brings attention to an area that is underrepresented in the current academic discourse. The second part of the book, which focuses on country cases, covers Botswana, Egypt, Kenya, Nigeria, Senegal, Zambia and Zimbabwe. The topics explored in those cases include religiosity, health, women ' s football, media and management. The coverage of health-related issues is particularly important given that several books on African football rarely broach such a topic. With its unique approach to African football, this book will be of interest to scholars and students of sports history, African studies, politics in sports and African sports.

The call for sport organizations and organizers to take up social responsibilities is reflected in a wide variety of sport-related practices. This book critically examines sport-related social interventions in different cultural settings, such as promoting local community-building by sport. Social constructions of peace, integration and managing diversity are studied from the perspective of sport and play, and the power position of global sport organizations with corporate features is discussed from the perspectives of good governance, legal issues and fair trade. Referring to Foucault ' s concept of biopolitics, this book contributes to the discussion on the rising power position and the social responsibilities of sports and sport organizations. It is a valuable contribution to the understanding of interconnections between sport and society for students in sociology, policy and politics of sport, for sport leaders, and for policy and decision-makers in sport.

From the Olympics to the World Cup, mega sporting events are a source of enjoyment for tens of thousands, but can also be a source of intense debate and controversy. This insightful new Handbook addresses a number of central questions, including: How are host cities selected and under what economic conditions? How are these events organized, and how is local resistance overcome? Based on historical and empirical experience, what are the pitfalls for the organizers of these events? What are the potential economic benefits, including any international image effects? How can the costs be minimized and the benefits maximized for host cities and countries? How do these mega events impact the challenges of globalization and what is their environmental legacy? Compiled and edited by two internationally renowned sports economists, the expert contributions elaborate on the specific mechanisms of the bid processes, analyse the determining factors of winning bids, and illustrate how to construct future bid campaigns. Underpinned by case studies from four continents and by theoretical considerations, the reasons for seemingly systemic cost overruns are explored and analysed, as are the effects on national and regional employment and income, property values, non-traditional economic variables (such as psychological and marketing benefits) and urban branding and transformation. The Handbook also reflects on important elements of design of the games in order to better plan, prepare and allocate resources – including, for example, sustainability issues and the use of campaigns to secure positive perceptions. This book provides an up-to-date analysis of the financing and economic impact of mega sporting events, as well as a full discussion of how host cities can maximize the benefits from their experience. As such, it will prove a fascinating read for academics, students, researchers and policymakers with an interest in economics and public sector economics generally, and more specifically, in the economics of sport.

Established in 1982, People of Today annually recognises over 20,000 individuals who are positively influencing Britain and inspiring others through their achievements and leadership. Entry is by invitation only. The objective criteria for inclusion and removal are strictly maintained, ensuring it is the only publication of its type whose membership accurately reflects people of influence today. Expert nomination panels guarantee People of Today is uniquely current and trusted and encompasses over 40 sectors, from academia, law and business to charity, sport and the arts.

Now in its second year, the Almanack of World Football 2007 is the definitive guide to the sport around the world. With privileged access to records and sources, the Almanack provides in-depth coverage of the international games and league and cup competitions of all 207 national football associations. In addition, the Almanack includes comprehensive coverage of all international tournaments, including the 2006 World Cup and all the continental competitions, including the UEFA Champions League, the Asian Champions League, and the Copa Libertadores. The depth of global information available in the Almanack cannot be matched by any other publication, and provides a vast range of fascinating facts, figures, and records for every football fan.

From Accra and Algiers to Zanzibar and Zululand, Africans have wrested control of soccer from the hands of Europeans, and through the rise of different playing styles, the rituals of spectatorship, and the presence of magicians and healers, have turned soccer into a distinctively African activity. African Soccerescapes explores how Africans adopted soccer for their own reasons and on their own terms. Soccer was a rare form of " national culture " in postcolonial Africa, where stadiums and clubhouses became arenas in which Africans challenged colonial power and expressed a commitment to racial equality and self-determination. New nations staged matches as part of their independence celebrations and joined the world body, FIFA. The Conf é d é ration africaine de football democratized the global game through antiapartheid sanctions and increased the number of African teams in the World Cup finals. In this compact, highly readable book Alegi shows that the result of this success has been the departure of huge numbers of players to overseas clubs and the growing influence of private commercial interests on the African game. But the growth of women ' s soccer and South Africa ' s hosting of the 2010 World Cup also challenge the one-dimensional notion of Africa as a backward, " tribal " continent populated by victims of war, corruption, famine, and disease.
