This lively, practical text presents a fresh and comprehensive approach to doing qualitative research. The book offers a unique balance of theory and clear-cut choices for customizing every phase of a qualitative study. A scholarly mix of classic and contemporary studies from multiple disciplines provides compelling, field-based examples of the full range of qualitative approaches. Readers learn about adaptive ways of designing studies, collecting data, analyzing data, and reporting findings. Key aspects of the researcher's craft are addressed, such as fieldwork options, the five phases of data analysis (with and without using computer-based software), and how to incorporate the researcher's “declarative” and “reflective” selves into a final report. Ideal for graduate-level courses, the text includes: \* Discussions of ethnography, grounded theory, phenomenology, feminist research, and other approaches. \* Instructions for creating a study bank to get a new study started. \* End-of-chapter exercises and a semester-long, field-based project. \* Quick study boxes, research vignettes, sample studies, and a glossary. \* Previews for sections within chapters, and chapter recaps. \* Discussion of the place of qualitative research among

The Death and Life of the Great Lakes is prize-winning reporter Dan Egan's compulsively readable portrait of an ecological catastrophe happening right before our eyes, blending the epic story of the lakes with an examination of the perils they face and the ways we can restore and preserve them for generations to come.*
