(The Bahamas are famous for sun, sand, and swimming pigs. National Geographic In the middle of paradise, with billionaires and celebrities for neighbors, is an island populated only by swimming pigs. For decades, this archipelago of 365 islands would remain largely unknown to the world. It would not be a ruthless pirate, pioneering loyalists, a notorious drug kingpin, or the infamous Fyre Festival that would unveil Exuma to the world, but rather the most unlikely of creatures. Appearing in magazines, videos, newspapers, commercials, TV shows, and countless selfies, the Swimming Pigs of Exuma, in the Bahamas, have become a bucket-list sensation and have been named one of the marvels of the universe. But how did they reach this celebrity status? What made them so famous? And why, in February 2017, did so many of them die? Pigs of Paradise is an unlikely story of humble beginnings and a swift rise to stardom. With interviews from historians, world-renowned ecologists, famous pig owners, and boat captains, it thoughtfully considers what this phenomenon says about not only these animals but also about us.

To all of those who have given thoughts to love and everyday happenings that we experience along the roads we travel. Some have loved and lost but the poems within these covers touch both sides, along with tragedies, dreams and just everyday occurrences that walk in and out of our life. Songs will be sung, books will be written and words will be set to rhyme, all with love in mind. Even in the midst of true love, you still search for more inner feelings, never taking for granted how and why one person became your eternal love for life. Even in the good and bad times. If love had been a musical instrument my wife and I would have had a full orchestra. This book, I believe, brings joy to all who wish to partake and share these moments of contentment. Look for Penny Aiken's first book A PENNY FOR YOUR THOUGHTS on sale now!

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

"She'd noticed immediately that I understood the lure of a good story. Sometimes a world that doesn't exist is the only escape from the one that does." When successful New York editor Jen Gibbs discovers a decaying slush-pile manuscript on her desk, she has no idea that the story of Sarra, a young mixed-race woman trapped in Appalachia at the turn of the twentieth century, will both take her on a journey and change her forever. Happy with her life in the city, and at the top of her career with a new job at Vida House Publishing, Jen has left her Appalachian past and twisted family ties far behind. But the search for the rest of the manuscript, and Jen's suspicions about the identity of its unnamed author, will draw her into a mystery that leads back to the heart of the Blue Ridge Mountains . . . and quite possibly through the doors she thought she had closed forever.

Put your best hoof forward. Small in stature but mighty in joy, here are the Pocket Pigs to remind us in the most playful and unassuming way to be grateful, stay curious, and keep ourselves open to the magic of life.

Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

To get a shot at a future, Olivia will have to face the bullets she's already fired in Debra Webb's classic Sins of the Past Dr. Olivia Mills has a past...one she faked her own death to escape. But one phone call destroys her carefully planned new life. See, Olivia isn't Olivia at all she is Vanessa Clark, former black ops assassin. And she's been ordered to kill someone she loves. When her old flame and ex-partner Holt Landry shows up, things get even more complicated. Once, he'd betrayed her. Now he asks for her trust. The more Olivia uncovers, the more she realizes the past is not what it seems. And if she doesn't go back, this time she'll die for real. Originally published in 2006.
