My 2001 4JX1 turbo diesel Jackaroo has a bit of an issue where after the car has been sitting for a few days then started up (it starts easily) it will have no oil pressure for about half a minute. During this time the oil pressure gauge is at zero and the oil light is on.

From what i've read in the forums so far, looks like if you want to play safe with your 4jx engine, you have to use the casa's besco api 30 oil. You might be taking risks with your injectors/turbo if you use another brand or grade of engine oil.

I wouldn't recommend it as your primary vehicle. the 4jx1 engine requires tedious attention (checking for diesel in the radiator, rising oil in the dip stick, hard starts, emission problems to name a few, as well as proper oil viscosity and regular 5000kms oil change) and meticulous trouble shooting, but thanks to this forum, I've acquired the manual which has helped me a lot.

Jackaroo, n. a male station hand. That is according to the "Australian Slang Dictionary" whereas the Macquarie Dictionary gives a more realistic version. " A jack of all trades". Certainly a jackaroo is far more than 'a male station hand', which will be evident as the reader moves through this recount of the writer's five years of 'Station Management Apprenticeship"', possibly a more precise definition of the word. ('Station" being a large sheep and/or cattle property/ranch). The origin of the word 'jackaroo' has been debated as long as the word has been in existence, but the most popular belief is that early English migrants, who worked on stations in the Australian Outback, were given the name of "Jack Raw", being raw to the ways of the Australian bush. One such English migrant, whose name was Jack Carew may have had an influence on the foundation of the word. There is also the more recent female counterpart, known as a jillaroo. It is however, generally agreed that the word has no connection with the famed Australian icon, the kangaroo.

This book provides a wealth of detailed information that collectors, investors, and restorers of imported cars will not find in any other book. This massive volume spans the marques of imported vehicles. The list includes such familiar names as Alfa Romeo, Aston Martin, Bentley, Citroen, Jaguar, Lamborghini, Porsche, Rolls-Royce, Saab, and Volkswagon. Also in these pages, you'll find details on such lesser-known yet no less intriguing marques as Abarth, DAF, Frazer Nash, Humber, Iso, Nardi, Panhard, Peerless, Sabra and Skoda. The book also highlights model changes and corporate histories and provides value information on the most popular models of imported cars.

This book focuses on particulate matter emissions produced by vehicles with combustion engines. It describes the physicochemical properties of the particulate matter, the mechanisms of its formation and its environmental impacts (including those on human beings). It discusses methods for measuring particulate mass and number, including the state-of-the-art in Portable Emission Measurement System (PEMS) equipment for measuring the exhaust emissions of both light and heavy-duty vehicles and buses under actual operating conditions. The book presents the authors' latest investigations into the relations between particulate emission (mass and number) and engine operating parameters, as well as their new findings obtained through road tests performed on various types of vehicles, including those using diesel particulate filter regeneration. The book, which addresses the needs of academics and professionals alike, also discusses relevant European regulations on particulate emissions and highlights selected methods aimed at the reduction of particulate emissions from automobiles.
