Lesson 8-2 Special Right Triangles 427 To prove Theorem 8-6, draw a 308-608-908 triangle using an equilateral triangle. Proof of Theorem 8-6 For 308-608-908 #WXY in equilateral #WXZ, is the perpendicular bisector of . Thus, $XY = XZ = XW$, or $XW = 2XY = 2s$. Also, $XY^2 + YW^2 = XW^2$ Use the Pythagorean Theorem. $s^2 + YW^2 = (2s)^2$ Substitute s for XY and 2 XW.

Get the blueprint for building bridges that leave no learner behind! Aligned with the Individuals with Disabilities Education Act and No Child Left Behind Act requirements, this comprehensive guide empowers teachers and administrators with research-validated practices and interventions that can close the general-curriculum performance gap and break down the barriers to academic success for middle and high school students with disabilities. This insightful resource features: Practical planning advice, teaching practices, and learning strategies for inclusive classrooms Methods for designing instructional materials Tips for effectively leveraging technology Strategies for transition beyond high school Real-life examples and illustrations

Eureka Math is a comprehensive, content-rich PreK-12 curriculum that follows the focus and coherence of the Common Core State Standards in Mathematics (CCSSM) and carefully sequences the mathematical progressions into expertly crafted instructional modules. The companion Study Guides to Eureka Math gather the key components of the curriculum for each grade into a single location, unpacking the standards in detail so that both users and non-users of Eureka Math can benefit equally from the content presented. Each of the Eureka Math Curriculum Study Guides includes narratives that provide educators with an overview of what students should be learning throughout the year, information on alignment to the instructional shifts and the standards, design of curricular components, approaches to differentiated instruction, and descriptions of mathematical models. The Study Guides can serve as either a self-study professional development resource or as the basis for a deep group study of the standards for a particular grade. For teachers who are new to the classroom or the standards, the Study Guides introduce them not only to Eureka Math but also to the content of the grade level in a way they will find manageable and useful. Teachers familiar with the Eureka Math curriculum will also find this resource valuable as it allows for a meaningful study of the grade level content in a way that highlights the coherence between modules and topics. The Study Guides allow teachers to obtain a firm grasp on what it is that students should master during the year. The Eureka Math Curriculum Study Guide, Grade 8 provides an overview of all of the Grade 8 modules, including Integer Exponents and Scientific Notation; The Concept of Congruence; Similarity; Linear Equations; Examples of Functions from Geometry; Linear Functions; Introduction to Irrational Numbers Using Geometry.
