Just finished reading an excellent book called "A Better India, a Better World" by Narayana Murthy, mentor at Infosys. This is a collection of his speeches, but the narrative is fine and Mr. Murthy is a fine thinker with a lot of innovative thoughts and ideas for improving India. A wonderful book to read, highly recommended.

Visit the website for A Better India; A Better World; here. With one of the highest GDP growth rates in the world and an array of recent achievements in technology; industry and entrepreneurship; India strides confidently towards the future. But; in the world's largest democracy; not everyone is equally fortunate. More than 300 million Indians are still prey to hunger; illiteracy and disease; and 51 per cent of India's children are still undernourished. What will it take for India to bridge this great divide? When will the fruits of development reach the poorest of the poor; and wipe the tears from the eyes of every man; woman and child; as Mahatma Gandhi had dreamt? And how should this; our greatest challenge ever; be negotiated? In this extraordinarily inspiring and visionary book; N.R. Narayana Murthy; who pioneered; designed and executed the Global Delivery Model that has become the cornerstone of India's success in information technology services outsourcing; shows us that a society working for the greatest welfare of the greatest number—samasta jananam sukhino bhavantu—must focus on two simple things: values and good leadership. Drawing on the remarkable Infosys story and the lessons learnt from the two decades of post-reform India; Narayana Murthy lays down the ground rules that must be followed if future generations are to inherit a truly progressive nation. Built on Narayana Murthy's lectures delivered around the world; A Better India: A Better World is a manifesto for the youth; the architects of the future; and a compelling argument for why a better India holds the key to a better world.

Cross-cultural exchange has characterized the economic life of India since antiquity. Its long coastline has afforded convenient access to Asia and Africa as well as trading partnerships formed in the exchange of commodities ranging from textiles to military technology and from opium to indigo. In a journey across two thousand years, this enthralling book, written by a leading South Asian historian, describes the ties of trade, migration, and investment between India and the rest of the world and shows how changing patterns of globalization have reverberated in economic policy, politics, and political ideology within India. Along the way, the book asks three major questions: Is this a particularly Indian story? When did the big turning points happen? And is it possible to distinguish the modern from the pre-modern pattern of exchange? These questions invite a new approach to the study of Indian history by placing the region at the center of the narrative. This is global history written on India's terms, and, as such, the book invites Indian, South Asian, and global historians to rethink both their history and their methodologies.

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.

"A 22-volume, highly illustrated, A-Z general encyclopedia for all ages, featuring sections on how to use World Book, other research aids, pronunciation key, a student guide to better writing, speaking, and research skills, and comprehensive index"--

• New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” –Per Espen Stoknes, Author, What We Think About When We Try Not To Think About Global Warming “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” –David Roberts, Vox “This is the ideal environmental sciences textbook–only it is too interesting and inspiring to be called a textbook.” –Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here–some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being–giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Data has cemented itself as a building block of daily life. However, surrounding oneself with great quantities of information heightens risks to one’s personal privacy. Additionally, the presence of massive amounts of information prompts researchers into how best to handle and disseminate it. Research is necessary to understand how to cope with the current technological requirements. Large-Scale Data Streaming, Processing, and Blockchain Security is a collection of innovative research that explores the latest methodologies, modeling, and simulations for coping with the generation and management of large-scale data in both scientific and individual applications. Featuring coverage on a wide range of topics including security models, internet of things, and collaborative filtering, this book is ideally designed for entrepreneurs, security analysts, IT consultants, security professionals, programmers, computer technicians, data scientists, technology developers, engineers, researchers, academicians, and students.

An insider's account of the personalities and policies that shaped Indian diplomacy Former foreign secretary, Maharajakrishna Rasgotra joined India's external affairs ministry when Jawaharlal Nehru, Girija Shankar Bajpai, Sardar Patel were–with a mix of pragmatism and hope–creating the foreign policy of the newly independent nation. This was taking place as the Cold War slid into the subcontinent and complex relationships with India's neighbours–China, Pakistan and Nepal–were taking shape. Looking back on those crucial years with a discerning eye for the interplay of personalities–Nehru, Krishna Menon, or S. Radhakrishnan, for instance–Rasgotra assesses their influence on events and their impact on the evolution of Indian diplomacy. For over three decades Rasgotra's assignments took him to Nepal, Britain and France, among other countries, as well as twice to the United States. His account of Nixon and Kissinger, and the mix of truculence and persuasion in their dealings with Mrs Gandhi in the run up to the 1971 Bangladesh war, sheds new light on the events of that time. His tenure as foreign secretary covered a period of great change and A Life in Diplomacy provides a ringside view of the beginnings of ethnic violence in Sri Lanka, the last years of the Cold War, the negotiations on the formation of SAARC, Mrs Gandhi's assassination and the Bhopal gas disaster. This is a compelling, authoritative account of a personal and professional journey; a reflective look at the leaders, events and forces that formed relations between India and the world over fifty years.
