To cap off my mini-lesson, I give each student one of my school counseling brochures for them to take home so moms and dads can learn about school counselors too! Since I get a lot of transient students throughout the school year, I made my presentation into a book (using cardstock and the binding machine) so I can share my lesson with my new students as well.

Designed for students who are taking a preliminary course in the counseling field, Introduction to the Counseling Profession, 7th Edition, provides a comprehensive overview of the history and foundational concepts of counseling, offering the most current and relevant breadth of coverage available from experts in their respective fields. This edition includes topics rarely discussed in introductory texts, such as self-care and self-growth and the use of technology in counseling, as well as a new chapter on crisis counseling. Chapters also reflect updates to the 2016 Council for the Accreditation of Counseling and Related Educational Programs (CACREP) standards, and a chapter on each CACREP specialization is included. Students will gain insight into the myriad issues that surround not only the process of counseling and its many populations but also the personal dynamics that have an impact on this process. Furthermore, a collection of supplemental resources is available online to benefit both instructors and students. Instructors will find PowerPoint slides and test banks to aid in conducting their courses, and students can access chapter summaries, exercises, and other tools to supplement their review of the

material in the text.

Introduction to Counseling by Michael Scott Nystul provides an overview of counseling and the helping professions from the perspective of art and science—the science of counseling that generates a knowledge base proven to promote competency and efficacy in the practitioner, and the art of using this knowledge base to build skills that can be applied sensitively to clients in a multicultural society. The Fifth Edition has been organized into three sections: (1) an overview of counseling and the counseling process, (2) multicultural counseling and counseling theories, and (3) special approaches and settings. It continues to address key topics and issues, including gender, culture, and sexual orientation, and offers ways to integrate multiculturalism into all aspects of counseling, rather than view it as a separate entity. Highlighting emerging trends and changes in ethical codes, as well as reflecting the latest updates to the Diagnostic Statistical Manual (DSM-5), the book successfully illustrates the importance of art and science to modern-day counseling.

This comprehensive graduate-level text prepares readers to handle the problems and responsibilities they'll face as professional school counselors, preschool through high school. It covers a wide range of topics in-depth, including: effective interventions for racism and bullying, the continuing score gap between ethnic groups, a school counselor's leadership role in implementing school-based action research, a model for advocating on behalf of, and providing services to children with disabilities. The book is packed with real life examples and case descriptions: it provides strategies for preventing and responding to social and emotional problems, improving educational outcomes, and helping children score at optimum levels on high-stakes tests.

Organized around the latest CACREP standards, Introduction to Professional Counseling integrates key theoretical concepts with discussion of the practical aspects of the field. Drawing from their own experiences as counseling practitioners, editors Varunee Faii Sangganjanavanich and Cynthia A. Reynolds explore what it means to develop a professional counseling identity, emphasizing
