and summarizes environmental impacts of migration – such as urbanization and deforestation. It also offers background on the health implications of environmental conditions such as climate change, natural disasters, scarcity of natural resources, as well as on resource scarcity and fertility, gender considerations in population and environment, and the connections between population size, growth, composition and carbon emissions. This handbook helps readers to better understand the complexities within population-environment connections, in addition to some of the opportunities and challenges within environmental demography. As such this collection is an invaluable resource for students, researchers, and policy analysts in the areas of demography, migration, fertility, health and mortality, as well as environmental, global and development studies.

Strategic Management and Business Policy is the new dimension in the field of Management. Managers must aware of the business, types of business, policies, products, competitors, core resource, tactics for formulation of strategy, implementation and controlling policies in effective manner in an organization with out affecting and its policy, objectives, goals, mission and vision of an organization. Strategic Management and Business Policy is purely meant for Managers, CEO, and Strategic Consultants, MBA and Business Students and Faculty members. Strategic Management for Managers book is divided into 29 chapters viz,: Business And Its Policy, Concept Of Strategy, Strategic Management, Vision, Mission, Objectives And Goals, Environment Analysis And Diagnosis, Strategic Advantage Analysis, Corporate Strategy, Michael Porter's Generic Strategies, Formulation Of Functional Strategy, Types Of Strategies, Diversification Strategies For Companies, Turnaround, Retrenchment Divestment,

Biochar is the carbon-rich product when biomass (such as wood, manure or crop residues) is heated in a closed container with little or no available air. It can be used to improve agriculture and the environment in several ways, and its stability in soil and superior nutrient-retention properties make it an ideal soil amendment to increase crop yields. In addition to this, biochar sequestration, in combination with sustainable biomass production, can be carbon-negative and therefore used to actively remove carbon dioxide from the atmosphere, with major implications for mitigation of climate change. Biochar production can also be combined with bioenergy production through the use of the gases that are given off in the pyrolysis process. This book is the first to synthesize the expanding research literature on this topic. The book's interdisciplinary approach, which covers engineering, environmental sciences, agricultural sciences, economics and policy, is a vital tool at this stage of biochar technology development. This comprehensive overview of current knowledge will be of interest to advanced students, researchers and professionals in a wide range of disciplines.

This fresh new text introduces IB from a truly global and contemporary perspective. Packed with case studies drawn from an impressive spectrum of countries, International Business enables students to link theory with practice and encourages critical thinking. Particular emphasis is placed on key issues such as the growing role of SMEs and entrepreneurship in IB, ethics, CSR, corporate governance and global warming.
