In recent years, more and more Christians have come to appreciate the Bible's teaching that the ultimate blessed hope for the believer is not an otherworldly heaven; instead, it is full-bodied participation in a new heaven and a new earth brought into fullness through the coming of God's kingdom. Drawing on the full sweep of the biblical narrative, J. Richard Middleton unpacks key Old Testament and New Testament texts to make a case for the new earth as the

appropriate Christian hope. He suggests its ethical and ecclesial implications, exploring the difference a holistic eschatology can make for living in a broken world.

In response to unprecedented environmental degradation, activists and popular movements have risen up to fight the crisis of climate change and the ongoing devastation of the earth. The environmental movement has undeniably influenced even its adversaries, as the language of sustainability can be found in corporate mission statements, government policy, and national security agendas. However, the price of success has been compromise, prompting soul-searching and questioning of the politics of environmentalism. Is it a revolutionary movement that opposes the current system? Or is it reformist, changing the system by working within it? In *Birth of a New Earth*, Adrian Parr argues that this is a false choice, calling for a shift from an opposition between revolution and incremental change to a renewed collective imagination. Parr insists that environmental destruction is at its core a problem of democratization and decolonization. It requires reckoning with militarism, market fundamentalism, and global inequality and mobilizing an alternative political vision capable of freeing the collective imagination in order to replace an apocalyptic mindset frozen by the spectacle of violence. *Birth of a New Earth* locates the emancipatory work of environmental politics in solidarities that can bring together different constituencies, fusing opposing political strategies and paradigms by working both inside and outside the prevailing system. She discusses experiments in food sovereignty, collaborative natural-resource management, and public-interest design initiatives that test new models of economic democratization. Ultimately, Parr proclaims, environmental politics is the refusal to surrender life to the violence of global capitalism, corporate governance, and militarism. This defiance can serve as the source for the birth of a new earth.

Award-winning author Ben Bova brings us *New Earth*, his latest tale of science fiction in his Grand Tour series. The entire world is thrilled by the discovery of a new Earthlike planet. Advance imaging shows that the planet has oceans of liquid water and a breathable oxygen-rich atmosphere. Eager to gain more information, a human exploration team is soon dispatched to explore the planet, now nicknamed New Earth. All of the explorers understand that they are essentially on a one-way mission. The trip takes eighty years each way, so even if they are able to get back to Earth, nearly 200 years will have elapsed. They will have aged only a dozen years thanks to cryonic suspension, but their friends and family will be gone and the very society that they once knew will have changed beyond recognition. The explorers are going into exile, and they know it. They are on this mission not because they were the best available, but because they were expendable. Upon landing on the planet they discover something unexpected: New Earth is inhabited by a small group of intelligent creatures who look very much like human beings. Who are these people? Are they native to this world, or invaders from elsewhere? While they may seem inordinately friendly to the human explorers, what are their real motivations? What do they want? Moreover, the scientists begin to realize that this planet cannot possibly be natural. They face a startling and nearly unthinkable question: Could New Earth be an artifact? From the Preface: There are indeed few books in the Bible where the modern student does not need deft guidance if reading is to prove profitable. In the case of the Book of Revelation that need becomes absolutely essential. When the average student takes up this book, almost without exception the going is tough, the language baffling, the sense of profit minimal. This situation represents a curious reversal, for in earlier centuries no other part of Scripture so greatly intrigued the imagination of Christendom or so greatly fascinated its painters and musicians The book at hand is designed to restore the Apocalypse to its rightful place in Christian thinking. The title asserts a continuing conviction: John as a prophet actually saw a new earth. The ordinary ways of perceiving reality had been radically altered by his faith in Christ.... Even moderns., in their traffic with "the earth," have accessible a greater diversity of visions than they suppose. The ancient prophet may still have power to enable us to see a new earth. Such at least is the premise that prompted the publication of this book.
