Yes-no question are often used in surveys to gauge people's attitudes with regard to specific ideas or beliefs. When enough data is gathered, those conducting the survey will have a measure based on a percentage of the population of how acceptable or unacceptable a proposition is. Here are some typical examples of survey questions:

Definition and Examples of the Yes-No Question

In English, there are two basic types of questions: Yes / No questions and Wh - questions. Yes / No questions are also called closed questions because there are only two possible responses: Yes or No. When forming a Yes / No question, it must include one of these verbs: BE, DO, HAVE, or a modal verb. It is impossible to ask a Yes / No question without one of these verbs.

A closed question can be answered by saying "yes" or "no", whereas an open question will need other words of explanation. For example, "How did you get here?" is an open question and will include a description of a journey in the answer. If the question is, "Did you drive here?" then the answer will be a simple yes or no.

In linguistics, a yes-no question, formally known as a polar question or a general question is a question whose expected answer is one of two choices, one that affirms the question and one that denies the question. Typically, in English, the choices are either "yes" or "no", but there are many others that could be used, such as "yep" and "nope". Formally, they present an exclusive disjunction, a pair of alternatives of which only one is acceptable.

In the study of language, as in any other systematic study, there is no neutral terminology. Every technical term is an expression of the assumptions and theoretical presuppositions of its users; and in this introduction, we want to clarify some of the issues that have surrounded the assumptions behind the use of the two terms "speech acts" and "pragmatics". The notion of a speech act is fairly well understood. The theory of speech acts starts with the assumption that the minimal unit of human communication is not a sentence or other expression, but rather the performance of certain kinds of acts, such as making statements, asking questions, giving orders, describing, explaining, apologizing, thanking, congratulating, etc. Characteristically, a speaker performs one or more of these acts by uttering a sentence or sentences; but the act itself is not to be confused with a sentence or other expression uttered in its performance. Such types of acts as those exemplified above are called,

following Austin, illocutionary acts, and they are standardly contrasted in the literature with certain other types of acts such as perlocutionary acts and propositional acts. Perlocutionary acts have to do with those effects which our utterances have on hearers which go beyond the hearer's understanding of the utterance. Such acts as convincing, persuading, annoying, amusing, and frightening are all cases of perlocutionary acts.

This monograph offers a comprehensive account of the L1-acquisition and use of yes-no questions in English from a usage-based, construction grammar perspective. On the basis of the BNC and a high-density, longitudinal CHILDES corpus, the book explores two issues which have largely been neglected in previous research: 1. the prevalence of non-canonical questions (such as elliptical and declarative questions) in adult-to-adult as well as child(-directed) speech and the L1-acquisition of these structures. 2. The discourse-functional properties of both canonical and non-canonical yes-no questions, especially with regard to their influence on the acquisition process.

The popular Christian apologist Kreeft tackles many of the tough questions of our day concerning Christianity. In a series of

imaginative "dialogues", Sal the Seeker and Chris the Christian deal with the profound mysteries of the Gospel. The result is a book that is both engaging and profound, a book that leads readers to initial faith—or to deeper faith. "The stakes in these dialogues are high. Christianity is God's marriage proposal to the soul, says Kreeft, and the answer must be "yes" or "no". We can evade the claims of Jesus Christ for a while, but death brings evasion to an end. It is wiser to look at Christianity honestly now. Yes or No? shows the truth of Jesus' promise that those who sincerely seek the truth shall find it. It is a road map for those who are honestly seeking the truth and a source of greater faith for those how have already found God. It presents the full challenge of the gospel in a way modern men and women can understand.

This book is a cross-linguistic study of the syntax of yes-no questions and their answers, drawing on data from a wide range of languages with particular focus on English, Finnish, Swedish, Thai, and Chinese. There are broadly two types of answer to yes-no questions: those that employ particles such as 'yes' and 'no' (as found in English) and those that echo a part of the question, usually the finite verb, with or without negation (as found in Finnish). The latter are uncontroversially derived by ellipsis, while the former

have been claimed to be clause substitutes. Anders Holmberg argues instead that even answers that employ particles are complete sentences, derived by ellipsis from full sentential expressions, and that the two types share essential syntactic properties. The book also examines the related cross-linguistic and intralinguistic variation observed in answers to negative questions such as 'does he not drink coffee?', whereby 'yes' in one language appears to correspond to 'no' in another. The book illustrates how a seemingly trivial phenomenon can have the most wide-ranging consequences for theories of language, and will be of interest not only to theoretical linguists but also to students and scholars of typological and descriptive linguistics.

judgments to corpus-based analysis to experimental approaches—to offer rich insights into different aspects of Ibero-Romance grammar. The volume consists of three parts, organized in accordance with the topics treated in the chapters they comprise. Part I focuses on structural patterns, Part II analyzes pragmatic ones, and Part III investigates the acquisition of linguistic aspects found in the speech of L1, L2 and heritage speakers. The authors address these issues by relying on empirically rooted linguistic approaches to data collection, which are coupled with current theoretical assumptions on the nature of sentence structure, discourse dynamics and language acquisition. The volume will be of interest to anyone researching or studying Hispanic and Ibero-Romance linguistics.

introduce the concept of consent. This book serves to normalize and celebrate the experience of asking for and being asked for permission to do something involving one's body. It centers on respect for bodily autonomy, and reviews the many ways that one can say or indicate "No." While young children are avid observers and questioners of their world, adults often shut down or postpone conversations on complicated topics because it's hard to know where to begin. Research shows that talking about issues like race, gender, and our bodies from the age of two not only helps children understand what they see, but also increases self-awareness, self-esteem, and allows them to recognize and confront things that are unfair, like discrimination and prejudice. These books offer a supportive approach that considers both the child and the adult. Illustrative art accompanies the simple and interactive text, and the backmatter offers additional resources and ideas for extending this discussion.
