guidance on vCJD).

Authoritative experts in transfusion medicine describe in critical detail the most important procedures for obtaining, selecting, and transfusing red blood cells to patients. The topics covered include such key issues as transfusion problems in the immunocompromised, the complications of autoantibodies, transfusion of

infants with hemolytic disease, difficulties arising from solid organ transplantation, stem cell transfusions, and the challenges of massive transfusion. Also discussed are the use, limitations, and alternatives to autogeneic cells; long-term red cell transfusion; the management of adverse reactions to red cell transfusions; and the question of blood group antigens and their association with disease and differential diagnosis. The book offers transfusion specialists fresh insights and information to maximize and extend their current knowledge.

This updated, fully searchable CD-ROM includes all content of the Technical Manual, 17th edition (also

and a guide to the programs search capabilities. Network licensing available: Give your entire staff access to this CD-ROM by arranging a licensing agreement with a sales associate.

This book steps in where hands-on practice may struggle to go. Written by practicing serologists and educators, these case study simulations examine techniques for alloantibody identification including use of chemicals, inhibition, adsorption, and adsorption/elution. Each case begins with a clinical scenario and initial test results, which are followed by

a series of multiple-choice questions that offer testing options and protocols for resolution. Along the way, the reader is provided with detailed feedback designed to enhance reflection and critical thinking. Equally suited to classroom or individual study, the printed book is supplemented by an online component without the answers, to provide a realistic testing situation.

Using a practical approach, the Manual of Veterinary Transfusion Medicine and Blood Banking provides veterinary practitioners with evidence-based guidelines to refer to at the clinical practice level. Provides evidence-based information on transfusion
