Explore all of the innovations in SAP NetWeaver AS Java (release 7.1) with this completely updated and expanded second edition of our best-selling title. If you're a Java developer entering the SAP world, or an ABAP programmer who needs to find out how the SAP application server is evolving, then this is the book for you. Gain insights into all topic areas linked to Java programming for SAP applications, including business logic, persistence, scalability, maintainability, development in teams, and UI design. In addition, three completely new chapters illustrate in detail the development of composite applications with the Composition Environment, and all other chapters provide revised and updated content for Java EE 5. The book uses an application-oriented approach to teach you how to integrate AS Java into your development

landscape, configure it, and leverage its tools productively.

If you're looking for a comprehensive learning resource that will guide you in the development of interfaces using SAP NetWeaver PI, then you've come to the right place. Whether you're an experienced developer looking to transition your skills or a novice developer trying to establish your career, you'll find that this book provides you with everything you need to get started with SAP NetWeaver PI. This book was written by developers, for developers. Each topic is covered with a balanced approach that combines conceptual theory with practical examples. Along the way, you'll find plenty of illustrations and code samples that will help you get started right away with your own developments. Within the book, you'll find detailed information about core development topics in SAP NetWeaver PI as well as some complementary Internet-based technologies that go hand-in-hand with modern interface development.

This updated and completely revised second edition of Inside Web Dynpro for Java covers everything you need to know to leverage the full power of Web Dynpro for Java - taking you well beyond the standard drag and drop functionality. For this second edition, sections on the migration of legacy applications have been added, as well as

another entirely new section devoted to integration topics. In addition, you'll find key details on the portal, Adobe Document Services, Business Graphics Server, MS Office, and mobile applications, and much more. General architecture Coding principles in Web Dynpro Dynamic UI generation The Common Model Interface The Adaptive RFC layer Web Dynpro phase model Class and Interface Reference

Web Dynpro ABAP, a NetWeaver web application user interface tool from SAP, enables web programming connected to SAP Systems. The authors' main focus was to create a book based on their own practical experience. Each chapter includes examples which lead through the content step-by-step and enable the reader to gradually explore and grasp the Web Dynpro ABAP process. The authors explain in particular how to design Web Dynpro components, the data binding and interface methods, and the view controller methods. They also describe the other SAP NetWeaver Elements (ABAP Dictionary, Authorization) and the integration of the Web Dynpro Application into the SAP NetWeaver Portal. The new edition has been expanded to include chapters on subjects such as POWER Lists; creating the Modal Windows and External Windows; using Web Dynpro application parameters and Shared Objects to communicate between the Web Dynpro ABAP Application and Business Server Pages; and creating multi-language mails using Web

Dynpro ABAP.

There are many things developers and administrators must consider when designing a successful portal application, including how content will be published, how to integrate custom developments, and how to connect to external systems. This book enables you to meet all of these requirements for creating applications for SAP NetWeaver Portal and publishing portal content. The book first provides a step-by-step introduction to roles, worksets, pages, and iViews. From there it guides you through all essential implementation phases, including user administration, connecting external systems using single sign-on, layout of externally facing portals, and ultimately transporting data to your live system. Two detailed workshops provide hands-on examples showing you exactly how to customize portal components and even create new ones.

ABAP developers, are you looking to clean up your code? Then pick up this official companion to the Clean ABAP GitHub repository.
