Witch, a female fighter pilot and military ace for the Soviet air force. These damaged women must bond together to help each other survive. In this companion volume to the critically acclaimed novel Code Name Verity, Elizabeth Wein continues to explore themes of friendship and loyalty, right and wrong, and unwavering bravery in the face of indescribable evil.

Bud Anderson is a flyers flyer. The Californians enduring love of flying began in the 1920s with the planes that flew over his fathers farm. In January 1942, he entered the Army Air Corps Aviation Cadet Program. Later after he received his wings and flew P-39s, he was chosen as one of the original flight leaders of the new 357th Fighter Group. Equipped with the new and deadly P-51 Mustang, the group shot down five enemy aircraft for each one it lost while escorting bombers to targets deep inside Germany. But the price was high. Half of its pilots were killed or imprisoned, including some of Buds closest friends. In February 1944, Bud Anderson, entered the uncertain, exhilarating, and deadly world of aerial combat. He flew two tours of combat against the Luftwaffe in less than a year. In battles sometimes involving hundreds of airplanes, he ranked among the groups leading aces with 16 aerial victories. He flew 116 missions in his old crow without ever being hit by enemy aircraft or turning back for any reason, despite one life or death confrontation after another. His friend Chuck Yeager, who flew with Anderson in the 357th, says, In an airplane, the guy was a mongoosethe best fighter pilot I ever saw. Buds years as a test pilot were at least as risky. In one bizarre experiment, he repeatedly linked up in midair with a B-29 bomber, wingtip to wingtip. In other tests, he flew a jet fighter that was launched and retrieved from a giant B-36 bomber. As in combat, he lost many friends flying tests such as these. Bud commanded a squadron of F-86 jet fighters in postwar Korea, and a wing of F-105s on Okinawa during the mid-1960s. In 1970 at age 48, he flew combat strikes as a wing commander against communist supply lines. To Fly and Fight is about flying, plain and simple: the joys and dangers and the very special skills it demands. Touching, thoughtful, and dead honest, it is the story of a boy who grew up living his dream.

Despite going into it with a wealth of technical experience, many pilots find the airline pilot selection process frustrating. Besides the technical expertise, today's airline pilot must also demonstrate highly developed leadership, decision-making and communication skills. Discussing one's abilities in these introspective areas requires a different kind of interview preparation than most pilots have experienced. This is where Checklist for Success comes in very handy. In this book, Cheryl Cage -- whose name has become synonymous with exceptional career guidance -- takes you from application through to the interview. She not only offers a thorough interview preparation but illustrates her points by stepping aside to reflect on her own experiences in counseling aspiring pilots, furloughed pilots, and career changers. The method and information Cheryl provides will not only make reaching your highest aviation career goals less frustrating, but shorter! This Sixth Edition has been revised and updated to reflect current hiring practices, and covers electronic interviewing and social media issues in job-searching.
