This book explores the intersectional perspective of sustainable social development in key sectors, such as education and skill development, health and nutrition, gender concerns, and food security and agriculture in India. It delves into contemporary concerns of poverty, employment and inclusive growth, and social marginalisation and inequality. The volume brings together the contributions of various stakeholders from academia, research organisations, NGOs and policymakers to address social-sector issues and sustainable development goals (SDGs) in the Indian context. It reflects on policies, strategies and performance in the context of Constitutional goals and the commitment to global SDGs and examines the character and contours of social development in the country. Comprehensive and topical, this volume will be useful to scholars, researchers, policymakers and practitioners of development studies, political studies, sociology and development economics.

To help individuals prepare for the COC| (formerly CPC-H®) examination, the AAPC has developed the COC| Study Guide. In each chapter of the study guide, pertinent outpatient/facility coding principles are followed by coding scenarios related to that chapter. The study guide is not an introduction to coding but a review of coding concepts.

Following in the wake of the World Trade Organization's engagement with Aid for Trade, this book brings together a range of perspectives around this emerging issue. The collection of articles in this volume presents many of the ideas elaborated through research conducted by International Lawyers and Economists Against Poverty (ILEAP) since 2005 and is intended to provide a basis for further study. Since many of the contributions on aid for trade to date have come from the North, the book looks to deepen the debate by forwarding voices and experiences from the South. The book traces the evolution of Aid for Trade from its beginnings and examines the global architecture, modalities, and costs associated with its implementation. Drawing on lessons from national and regional experiences, this book further explores ways in which Aid for Trade can both move forward and become a real tool for poverty reduction in beneficiary countries.
