The first in-depth study of the puzzling relationship between Japan and the Republic of Korea and the influence of the United States on it from the Cold War to the present. It draws on recently declassified U.S. documents, internal Korean government documents, and interviews with former policy makers in the United States, Japan, and Korea.

Victor D. Cha and David C. Kang's Nuclear North Korea was first published in 2003 amid the outbreak of a lasting crisis over the North Korean nuclear program. It promptly became a landmark of an ongoing debate in academic and policy circles about whether to engage or contain North Korea. Fifteen years later, as North Korea tests intercontinental ballistic missiles and the U.S. president angrily refers to Kim Jong-un as "Rocket Man," Nuclear North Korea remains an essential guide to the difficult choices we face. Coming from different perspectives—Kang believes the threat posed by Pyongyang has been inflated and endorses a more open approach, while Cha is more skeptical and advocates harsher measures, though both believe that some form of engagement is necessary—the authors together present authoritative analysis of one of the world's thorniest challenges. They refute a number of misconceptions and challenge the faulty thinking that surrounds the discussion of North Korea, particularly the idea that North Korea is an irrational actor. Cha and Kang look at the implications of

a nuclear North Korea, assess recent and current approaches to sanctions and engagement, and provide a functional framework for constructive policy. With a new chapter on the way forward for the international community in light of continued nuclear tensions, this book is of lasting relevance to understanding the state of affairs on the Korean peninsula.

Coming to the issues from different perspectives, the authors together have written an essential work of clear-eyed reflection and authoritative analysis. They refute a number of misconceptions and challenge faulty thinking that surrounds the discussion of North Korea, most important, the idea that North Korea is an irrational nation. Cha and Kang contend that however provocative, even deplorable, the North's behavior may at times be, it is not incomprehensible or incoherent.

A close look at the evolution of American political alliances in Asia and their future While the American alliance system in Asia has been fundamental to the region's security and prosperity for seven decades, today it encounters challenges from the growth of China-based regional organizations. How was the American alliance system originally established in Asia, and is it currently under threat? How are competing security designs being influenced by the United States and China? In *Powerplay*, Victor Cha draws from theories about alliances, unipolarity, and regime complexity to examine the evolution of the U.S. alliance system and the reasons for its continued importance in Asia and the world. Cha delves into the fears, motivations, and aspirations of the Truman and Eisenhower presidencies as they contemplated alliances with the Republic of China, Republic of Korea, and Japan at the outset of the Cold War. Their choice of a bilateral "hub and spokes" security design for Asia was entirely different from the system created in Europe, but it was essential for its time. Cha argues that the alliance system's innovations in the twenty-first century contribute to its resiliency in the face of China's increasing prominence, and that the task for the world is not to choose between American and Chinese institutions, but to maximize stability and economic progress amid Asia's increasingly complex political landscape. Exploring U.S. bilateral relations in Asia after World War II, *Powerplay* takes an original look at how global alliances are achieved and maintained.

Against the backdrop of China's mounting influence and North Korea's growing nuclear capability and expanding missile arsenal, South Korea faces a set of strategic choices that will shape its economic prospects and national security. In *South Korea at the Crossroads*, Scott A. Snyder examines the trajectory of fifty years of South Korean foreign policy and offers predictions—and a prescription—for the future. Pairing a historical perspective with a shrewd understanding of today's political landscape, Snyder contends that South Korea's best strategy remains investing in a robust alliance with

the United States. Snyder begins with South Korea's effort in the 1960s to offset the risk of abandonment by the United States during the Vietnam War and the subsequent crisis in the alliance during the 1970s. A series of shifts in South Korean foreign relations followed: the "Nordpolitik" engagement with the Soviet Union and China at the end of the Cold War; Kim Dae Jung's "Sunshine Policy," designed to bring North Korea into the international community; "trustpolitik," which sought to foster diplomacy with North Korea and Japan; and changes in South Korea's relationship with the United States. Despite its rise as a leader in international financial, development, and climate-change forums, South Korea will likely still require the commitment of the United States to guarantee its security. Although China is a tempting option, Snyder argues that only the United States is both credible and capable in this role. South Korea remains vulnerable relative to other regional powers in northeast Asia despite its rising profile as a middle power, and it must balance the contradiction of desirable autonomy and necessary alliance.

The definitive account of North Korea, its veiled past and uncertain future, from the former Director for Asian Affairs at the National Security Council Though it is much discussed and often maligned, precious little is known or understood about North Korea, the world's most controversial and isolated country. In *The Impossible State*, seasoned international-policy expert and lauded scholar Victor Cha pulls back the curtain, providing the best look yet at North Korea's history, the rise of the Kim family dynasty, and the obsessive personality cult that empowers them. He illuminates the repressive regime's complex economy and culture, its appalling record of human-rights abuses, and its belligerent relationship with the United States, and analyzes the regime's major security issues—from the seemingly endless war with its southern neighbor to its frightening nuclear ambitions—all in light of the destabilizing effects of Kim Jong-il's recent death. How this enigmatic nation-state—one that regularly violates its own citizens' inalienable rights and has suffered famine, global economic sanctions, a collapsed economy, and near total isolation from the rest of the world—has continued to survive has long been a question that preoccupies the West. Cha reveals a land of contradictions, one facing a pivotal and disquieting transition of power from tyrannical father to inexperienced son, and delves into the ideology that leads an oppressed, starving populace to cling so fiercely to its failed leadership. With rare personal anecdotes from the author's time in Pyongyang and his tenure as an adviser in the White House, this engagingly written, authoritative, and highly accessible history offers much-needed answers to the most pressing questions about North Korea and ultimately warns of a regime that might be closer to its end than many might think—a political collapse for which America and its allies may be woefully unprepared.

The Beijing Olympics will be remembered as the largest, most expensive, and most widely watched event of the modern Olympic era. But did China present itself as a responsible host and an emergent international power, much like Japan during the 1964 Tokyo Games and South Korea during the 1988 Seoul Games? Or was Beijing in 2008 more like Berlin in 1936, when Germany took advantage of the global spotlight to promote its political ideology at home and abroad? Beyond the Final Score takes an original look at the 2008 Beijing games within the context of the politics of sport in Asia. Asian athletics are bound up with notions of national identity and nationalism, refracting political intent and the processes of globalization. For China, the Beijing Games introduced a liberalizing ethos that its authoritative regime could ignore only at its peril. Victor D. Cha-former director of Asian affairs for the White House-evaluates Beijing's contention with this pressure, considering the intense scrutiny China already faced on issues of counterproliferation, global warming, and free trade.

A new interpretation of the Cold War from the perspective of the smaller and middle powers in Asia, the Middle East and Europe.

This study brings together Asian and Asia-based experts of international relations and U.S. foreign policy to present diverse Asian views about preferred modes of U.S. engagement in the region and compare their views with U.S. interests in the region-a prerequisite exercise to truly multilateral regional security governance. With the rise of Chinese power in absolute and relative terms over the next decades as a key driving factor of the international relations in the Asia Pacific, the United States has announced its "Rebalance to Asia" (previously referred as "Pivot to Asia") strategy. Asian responses, perceptions, and even interpretations of the U.S. strategy have been diverse. Misconceptions of the U.S. strategy can be attributed to the built-in contradictions among its objectives, deliberate ambiguities left by the architects of the strategy, mismatch between the stated strategy and actual policy implementations during the last three years, and subjective reading by the Asian countries through the lens of their own interests. This book will illuminate the diversity of Asian responses and perceptions and analyze the underlying reasons of the diversity. The overarching framework of analysis for this book is the very dilemma of alliances-abandonment and entrapment-which "hedging" aims at evading. "Abandonment" fear is primarily of the junior partner of an alliance that its senior partner may not come to its aid in crisis. Meanwhile, "entrapment" fear works both ways. The United States may drag its allies into its conflict against a third party, but U.S. allies may also drag the United States into their regional conflicts in which the United States has no direct or significant stake. The Asian choices of their strategic responses to the U.S. Rebalancing will be described and analyzed through the lens of the perceived balance between the abandonment and entrapment fears as well as other

historical and domestic factors unique to each Asian country. The reading of the U.S. strategy by Asian countries is a subjective matter, and their interests likely influence their analysis and consequently strategies. It is not the aim of this volume to establish well defined "cause-and-effect" chain between the U.S. strategy and Asian strategies, but thick descriptions have enabled some chapter authors to identify reciprocal relations between the two. While China's growth is the most important driver of the changing strategic landscape in the Asia Pacific and the new U.S. strategy, the new U.S. strategy inevitably influence the Chinese strategy, which in turn triggers a chain reaction of strategic revisions in Asian countries. This book is essential reading for scholars in Asian politics, U.S. foreign policy, international relations as well as for policy makers.
