During the American Civil War, songs united and inspired people on both sides. The North had a well-established music publishing industry when the war broke out, but the South had no such industry. The importance of music as an expression of the South's beliefs was obvious; as one music publisher said, "The South must not only fight her own battles but sing her own songs and dance to music composed by her own children." Southern entrepreneurs quickly rose to the challenge. This reference book is distinguished by three major differences from previously published works. First, it lists sheet music that is no longer extant (and listed nowhere else). Second, it gives complete lyrics for all extant songs, a rich source for researchers. And third, a brief historical background has been provided for many of the songs. Each entry provides as much of the following as possible (staying faithful to the typography of each title page): the title as published, names of all lyricists, composers and publishers; dates of publication; cities of publication; and if applicable, the names of catalogs or magazines in which the song appeared. Music published in Southern cities under Federal occupation is excluded.

Well-researched compilation of music information, analyzes nearly 1,000 of the world's most familiar melodies -- composers, lyricists, copyright date, first lines of music, lyrics, and other data. Includes 30 black-and-white illustrations.

Cryo Kid: Drawing a New Map is an exploration inspired by true experience. Written with insightful humor and a sense of wonder from the perspective of a seventy-something grandmother, it is educational, positive, and eye-opening. The author, Corinne Heather Copnick (Grandma), explores the exponential transformation that has taken place in families in her lifetime, as well as the infertility crisis currently experienced by career women who waited too long to have children. Her own granddaughter, the Cryo Kid of the title, seven years old in 2007, came into being through an anonymous donor from a sperm bank. Against the backdrop of three cities, Montreal, Toronto, and Los Angeles, Cryo Kid is written in several voices (narrators): the author, her daughter, the granddaughter (a gifted child who adds so much joy to their lives), and the sperm donor. It describes the experiences of two of Grandma's daughters, who conceived through assisted-reproduction technology (sperm donors), explores the generational changes in Grandma's own family, and details the remarkable discovery of siblings across the country, as well as the unexpected participation of the donor. The last chapter concerns well-researched future possibilities in assisted reproductive technology. (The word "cryo" is short for cryogenics.) corinne@timesolvers.com
