Taking a multidisciplinary approach to examine the dynamics of ethno-national contestation and colonialism in Israel/Palestine, this book investigates the approaches for dealing with the colonial and post-colonial urban space, resituating them within the various theoretical frameworks in colonial urban studies. The book uses Henry Lefebvre's three constituents of space – perceived, conceived and lived – to analyse past and present colonial cases interactively with time. It mixes the non-temporal conceptual framework of analysis of colonialism using literature of previous colonial cases with the inter-temporal abstract Lefebvrian concepts of space to produce an inter-temporal re-reading of them. Israeli colonialism in the occupied areas of 1967, its contractions from Sinai and

Gaza, and the implications on the West Bank are analysed in detail. By illustrating the transformations in colonial urban space at different temporal stages, a new phase is proposed - the trans-colonial. This provides a conceptual means to avoid the pitfalls of neo-colonial and post-colonial influences experienced in previous cases, and the book goes on to highlight the implications of such a phase on the Palestinians. It is an important contribution to studies on Middle East Politics and Urban Geography.

This book explores the development of the Palestinian Liberation Organization (PLO) from a liberation movement to a national authority, the Palestinian National Authority (PNA). Based on intensive fieldwork in the West Bank, Gaza and Cairo, Nigel Parsons analyzes Palestinian internal politics and their institutional-building by looking at the development of the PLO. Drawing on interviews with leading figures in the PLO and the Palestinian Authority, delegates to the negotiations with Israel, and the Palestinian political opposition, it is a timely account of the Israel/Palestine

conflict from a Palestinian political perspective.

The Palestinian national movement reached a dead-end and came close to disintegration at the beginning of the present century. The struggle for power after the death of Yasser Arafat in 2004 signaled the end of a path toward statehood prepared by the Oslo Accords a decade before. The reasons for the failure of the movement are deeply rooted in modern Palestinian history. As'ad Ghanem analyzes the internal and external events that unfolded as the Palestinian national movement became a "failed national movement," marked by internecine struggle and collapse, the failure to secure establishment of a separate state and achieve a stable peace with Israel, and

What does it mean to be modern outside the West? Based on a wealth of primary data collected over five years, *Reality Television and Arab Politics* analyzes how reality television stirred an explosive mix of religion, politics, and sexuality, fuelling heated polemics over cultural authenticity, gender relations, and political participation in the Arab world. The controversies, Kraidy argues, are best understood as a social laboratory in which actors experiment with various forms of modernity, continuing a long-standing Arab preoccupation with specifying terms of engagement with Western modernity. Women and youth take center stage in this process.

Against the backdrop of dramatic upheaval in the Middle East, this book challenges the notion of a monolithic "Arab Street" and offers an original perspective on Arab media, shifting attention away from a narrow focus on al-Jazeera, toward a vibrant media sphere that compels broad popular engagement and contentious political performance.

Advances in the field of information and communication technologies have substantially affected most segments of our life, leading to the Information Age or Information Revolution. On both individual and state scale, 'information' has become a vital 'commodity' by which one measures levels of knowledge, skills, well-being, prosperity and development. This academic work traces the evolution of

the Information Age and the emerging trends of diplomacy and politics in today's world. It signals potential opportunities and threats, while strategically forecasting current and future implications. Including three major chapters, the work is divided into eleven significant themes. It reviews the emergence of knowledge-based societies and highlights their main features. The course of globalization, the worldwide Internet development, the consequences of restricting the flow of information, and the Revolution in Military Affairs are among the issues examined. Also thoroughly treated is the evolution of diplomacy, with reference to information and intelligence gathering, analysis, and policy-making. The publication outlines the qualifications of diplomats and executives required

at the present and coming stages of professionalism. In addition to examining contemporary traditional and non-traditional conflicts around the globe, it takes a look at U.S. hegemony policies in world affairs. Certain cultural and social issues directly linked to the Information Age are dealt with as well. They refer to the growing importance of culture and identity awareness in an era of increasing social interdependence, and to the global evolution of languages and their use in everyday life and in current affairs. The book concludes with a set of observations in the aftermath of the September 11 attacks on the United States. The observations point to particular notions and developments that influence our way of living, politics and diplomacy. Furthermore, specific analysis is made

Heck challenges the conventional wisdom that the Wahhabi movement or classic Islamic doctrines are the root causes of terrorism in the Middle East. Instead, he argues that modern Middle Eastern terrorism stems from aborted efforts by Western intelligence agencies to co-opt political Islam as an opposing force against other emerging global ideologies deemed more politically dangerous at the time. The greatest chance to neutralize these fringe elements lies not through the imposition of Anglo-American democracy but in the creation of constructive economic development programs that ensure the distribution of wealth to the economically disenfranchised.

This book is a comprehensive overview and analysis of the Palestinians' travail as they move from revolutionary movement to state. Barry Rubin outlines the difficulties in the transition now under way arising from Palestinian history, society, and diplomatic agreements. He writes about the search for a national identity, the choice of an economic system, and the structure of government. Rubin finds the political system interestingly distinctive--it appears to be a pluralist dictatorship. There are free elections, multiple parties, and some latitude in civil liberties. Yet there is a relatively unrestrained chief executive and arbitrariness in applying the law because of restraints on freedom. The new ruling elite is a complex mixture of veteran

revolutionaries, heirs to large and wealthy families, professional soldiers, technocrats, and Islamic clerics. Beyond explaining how the executive and legislative branches work, Rubin factors in the role of public opinion in the peace process, the place of nongovernmental institutions, opposition movements, and the Palestinian Authority's foreign relations--including Palestinian views and interactions with the Arab world, Israel, and the United States. This book is drawn from documents in Arabic, Hebrew, and English, as well as interviews and direct observations. Rubin finds that, overall, the positive aspects of the Palestinian Authority outweigh the negative, and he foresees the establishment of a Palestinian state. His charting of the triumphs and difficulties of this state-in-
