Presents strategies for helping children with autism interact with others and achieve their potential, covering such areas as back-and-forth interactions, nonverbal communication, and imitation.

Cutting-edge research reveals that parents can play a huge role in helping toddlers and preschoolers with autism spectrum disorder (ASD) connect with others and live up to their potential. This encouraging guide from the developers of a groundbreaking early intervention program provides doable, practical strategies you can use every day. Nearly all young kids—including those with ASD—have an amazing capacity to learn. Drs. Sally Rogers, Geraldine Dawson, and Laurie Vismara make it surprisingly simple to turn daily routines like breakfast or bath time into fun and rewarding learning experiences that target crucial developmental skills. Vivid examples illustrate proven techniques for promoting play, language, and engagement. Get an early start—and give your child the tools to explore and enjoy the world.

Mental health professionals, see also the authors' related intervention manual, Early Start Denver Model for Young Children with Autism, as well as the Early Start Denver Model Curriculum Checklist for Young Children with Autism (sold in sets of 15).

Presents strategies for helping children with autism interact with others and achieve their potential, covering such areas as back-and-forth interactions, nonverbal communication, and imitation.

From leading authorities, this state-of-the-art manual presents the Early Start Denver Model (ESDM), the first comprehensive, empirically tested intervention specifically designed for toddlers and preschoolers with autism spectrum disorder. Supported by the principles of developmental psychology and applied behavior analysis, ESDM's intensive teaching interventions are delivered within play-based, relationship-focused routines. The manual provides structured, hands-on strategies for working with very young children in individual and group settings to promote development in such key domains as imitation; communication; social, cognitive, and motor skills; adaptive behavior; and play. Implementing individualized treatment plans for each child requires the use of an assessment tool, the Early Start Denver Model Curriculum Checklist for Young Children with Autism. A nonreproducible checklist is included in the manual for reference, along with instructions for use; 8½" x 11" checklists are sold separately in sets of 15 ready-to-use booklets. See also the authors' related parent guide, An Early Start for Your Child with Autism.

Signing babies are taking over, asking for more milk and later nap times. Sure, they might not get their way, but signing

Read Online An Early Start For Your

gives them a way to express themselves. Frustrated communication is often the root cause of crying and tantrums in babies and toddlers. Usually it is caused by the lag between a child's desire to be understood and their ability to form words. Sign language bridges this gap. The Everything Baby Sign Language Book teaches parent and children to use a combination of sign language and homemade gestures to communicate needs, wants and feelings. Using this book and instructional DVD, baby and parent will be well on their way to using their hands to speak! Please note: DVD is not included with the e-book version of this title

This book examines a group-based adaptation of the Early Start Denver Model (ESDM) designed for use with preschoolers with autism spectrum disorder (ASD). It describes the principles and procedures of the Group-Based Early Start Denver Model (G-ESDM) and provides practical and empirical guidelines for implementing effective, affordable programs across public healthcare and educational settings. Chapters offer rationales and strategies for designing and evaluating interventions, building interdisciplinary teams, and organizing learning spaces to engage student interest. Examples discuss the social interactions in groups that provide opportunities for learning, improving interpersonal skills, and reducing problem behaviors. In addition, the book offers ideas for retooling teaching strategies when an individual child lags behind the rest of the group. Featured topics include: Creating treatment objectives in the G-ESDM. Setting up the G-ESDM team and learning environment. Development of the G-ESDM classroom curriculum. Practical tools such as decision-making trees, teaching templates, and fidelity systems. Facilitating learning through peer interactions and social participation. Implementing the Group-Based Early Start Denver Model for Preschoolers with Autism is a must-
