Dana combines beautiful art, the relaxing nature of watercolor and step-by-step guidance so readers can learn to make her incredible artwork. This book will feature 50 whimsical, forest-themed projects--like a feather, fox, butterfly, wild flower, bumblebee or an owl. Like an art teacher in a studio, Dana walks the reader through each step of creating the paintings. Each project features a new technique to master that readers can integrate into their own pieces. This book will be printed on high-quality watercolor paper so that new techniques can be tested in the tutorial sections and the watercolors will blend effortlessly on every page. With perforated pages, readers will be able to hang their completed masterpiece on the wall. Dana has 118K followers on Instagram, 65K on YouTube and 16K on Facebook.This book will have 50 projects.

Auflage: Aktualisierte Darstellung der Sepsis-3-Leitlinie Die neuen ERC-Guidelines sind eingearbeitet. Intensive Überarbeitung vieler Kapitel, z.B. zur Ernährung auf der Intensivstation Viele neue Bilder

This open access book discusses how the involvement of citizens into scientific endeavors is expected to contribute to solve the big challenges of our time, such as climate change and the loss of biodiversity, growing inequalities within and between societies, and the sustainability turn. The field of citizen science has been growing in recent decades. Many different stakeholders from scientists to citizens and from policy makers to environmental organisations have been involved in its practice. In addition, many scientists also study citizen science as a research approach and as a way for science and society to interact and collaborate. This book provides a representation of the practices as well as scientific and societal outcomes in different disciplines. It reflects the contribution of citizen science to societal development, education, or innovation and provides and overview of the field of actors as well as on tools and guidelines. It serves as an introduction for anyone who wants to get involved in and learn more about the science of citizen science.

5O No-Sketch Projects That Bring the Ocean to Life Dana Fox, author of Watercolor with Me: In the Forest and founder of Wonder Forest, provides fifty new marine-themed projects in this beginner-friendly watercolor guide. Known for her whimsical art style and straightforward instruction, Dana leads you through three major watercolor techniques: wet-on-wet, wet-on-dry, and ink-and-wash. Best of all, there's no sketching required, so you can focus on each painting method. Bring adorable sea creatures like octopuses and otters to life on high-quality art paper. Start simple with shading in a monochromatic orca, experiment with adding depth to color with a bright bobbing seahorse and practice stylizing your subject in a charming lighthouse scene. With inspired art and step-by-step instruction, it's easy to pick up a paintbrush, break out your palette, and create something beautiful.

The two-volume set LNCS 12376 and 12377 constitutes the refereed proceedings of the 17th International Conference on Computers Helping People with Special Needs, ICCHP 2020, held in Lecco, Italy, in September 2020. The conference was held virtually due to the COVID-19 pandemic. The 104 papers presented were carefully reviewed and selected from 206 submissions. Included also are 13 introductions. The papers are organized in the following topical sections: Part I: user centred design and user participation in inclusive R&D; artificial intelligence, accessible and assistive technologies; XR accessibility

- learning from the past, addressing real user needs and the technical architecture for inclusive immersive environments; serious and fun games; large-scale web accessibility observatories; accessible and inclusive digital publishing; AT and accessibility for blind and low vision users; Art Karshmer lectures in access to mathematics, science and engineering; tactile graphics and models for blind people and recognition of shapes by touch; and environmental sensing technologies for visual impairment Part II: accessibility of non-verbal communication: making spatial information accessible to people with disabilities; cognitive disabilities and accessibility - pushing the boundaries of inclusion using digital technologies and accessible eLearning environments; ICT to support inclusive education - universal learning design (ULD); hearing systems and accessories for people with hearing loss; mobile health and mobile rehabilitation for people with disabilities: current state, challenges and opportunities; innovation and implementation in the area of independent mobility through digital technologies; how to improve interaction with a text input system; human movement analysis for the design and evaluation of interactive systems and assistive devices; and service and care provision in assistive environments 10 chapters are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Even doctors and the most sophisticated tests can't always find the source of a health issue, but there is one authority that always knows-your own body. "We intuitively perceive what we need for physical, emotional, and spiritual healing," teaches Marie Manuchehri. "The biggest challenge for most of us is learning to trust our inner guidance." With Intuitive Self-Healing, this registered nurse and renowned energy healer provides accessible instruction for helping you tune into your health at a deeper level. Offering a compendium of illuminating case studies and practical self-care techniques, Marie invites you to learn more about: The chakra system-how to access and activate seven energy centers that hold the key to our wholeness and intuitive gifts A chakra-by-chakra examination of specific health and emotional issues, with easy self-assessment quizzes Energetic preventative care-detecting and addressing potential health problems before they physically manifest Hands-on tools for accessing intuition, including one-minute exercises to ground and balance your energy-anywhere Your intuitive style-how to discover your unique strengths for reading and working with subtle energy Through her popular radio show and workshops, Marie Manuchehri has provided invaluable guidance for those seeking to take a more active role in their own well-being. "Everyone has the power to create a vital, fulfilling, and healthy life," teaches Manuchehri-and with Intuitive Self-Healing, she offers key insights for awakening your own life-changing gifts. "This engaging book is the result of one person's dedication to trusting her intuition and learning from careful observation of people in need. Each case example gives an 'inside scoop' about the ways an energy healer's perceptions can guide whole-

person healing. Each personal exercise given is a valuable guide for activating the reader's intuition. I strongly recommend this fascinating guidebook!" —Dorothea Hover-Kramer, EdD, RN, DCEP Excerpt Intuitive Healing isn't new. It's been around for centuries, but we have forgotten what it means to listen to our own body's messages. Instead, we have given our healing power away by not paying attention to our feelings and centered thoughts when we feel ill or are diagnosed with a disease. Intuition by definition is about knowing. Intuitive healing begins with discovering the vital energy within. There is nothing unusual about it. We all possess it. Each of us is our own best healer. Coming to know this intelligence within manifests itself in many different ways. Some people view images in their mind, hear words, or feel sensations. Others pick up insights during their daily life which seem to come from others—from radio, television, or billboard advertisements. Wherever our insights arise from, we all possess the aptitude to recognize them and discover what is in our best interest. Even if you have tried many times to perceive your internal messages, but feel that you possess no skill to do so—trust me you do. After working with thousands of clients, I've learned that everyone has the capacity to receive, interpret, and successfully use their senses. You have this ability because we are genuinely powerful. You might be unaware of your great fortune, but nevertheless you are powerful. Table of Contents Chapter 1: Intuitive Self-Healing Chapter 2: First Chakra: Embracing Your First Family Chapter 3: Second Chakra: Becoming Passionate Chapter 4: Third Chakra: Learning to Love Yourself Chapter 5: Fourth Chakra: Giving and Receiving Chapter 6: Fifth Chakra: Speaking Your Truth Chapter 7: Sixth Chakra: Becoming a Multisensory Being Chapter 8: Seventh Chakra: Connecting to Spirit Chapter 9: Scanning the Body and the Human Aura Appendix: Chakra Reference Table

This book on fintechs shows an international comparison on a global level. It is the first book where 10 years of financing rounds for fintechs have been analyzed for 10 different fintech segments. It is the first book to show the Canvas business model for fintechs. Professionals and students get a global understanding of fintechs. The case examples in the book cover Europe, the U.S. and China. About the author: Matthias Fischer is professor of finance and banking at the Institute of Technology Nuremberg Georg-Simon-Ohm in Germany. His research has focused on strategy and M&A in the banking sector, value-based management, robo-advisory and fintechs. Dr. Fischer also serves as a member of the Groupe de Recherche en Management at the IAE Nice Graduate School of Management, Université Côte d'Azur in France. He is internationally active as a strategy and financial advisor. Reviews of the book: FinTech is not the next 'big thing.' It is the big thing now! FinTech is the new business model for the global financial sector, offering clear and enormous potential for vast economies of scale and scope, massive cost savings and efficiency gains, significant risk reduction, and opening the door to banking for literally billions of currently unbanked people. Professor Fischer has

done a masterful job of expertly and informatively taking us through all aspects of the revolutionary new FinTech business models. Using state-of-the-art research techniques, he insightfully shows us how FinTech firms are financed and how they aspire to create value. His in-depth case studies unlock the keys to success in the FinTech sector. His fascinating book is a 'must read' for all financial professionals. Dr. Stephen Morrell, Professor of Economics and Finance, Andreas School of Business, Barry University, Miami, USA Matthias Fischer's latest book offers a comprehensive overview of Fintech business models around the world. With a very pedagogical approach, and in a particularly fluid style, the author takes us into the strategic logics of these new entrants to finance, who are carriers of innovation and sometimes of disruption, and whose strategies are focused on the need to always meet the emerging expectations of their customers. This precise and well-documented analysis should enable banks to reposition themselves in their ecosystem by studying these new business models, which will enable them to boost their growth. Professor Dr. Nadine Tournois, Dean of IAE Nice Graduate School of Management, Université Côte d'Azur, France, Chevalier de la Légion d'honneur Fintech Business Models is a must-have book to understand the rapid and intense changes occurring in the financial sector. New technologies have allowed the birth of new financial species, such as Fintech, more adapted to the new digital economy. The content dedicated to the application of blockchain technology helps to understand its opportunities in the financial sector, not only in the means of payment and cryptoactives, but also in how blockchain can make multiple internal processes improve, allowing to optimize the management, efficiency and even security of operations. Without any doubt, this book offers an extraordinary vision of how the fintech sector has become a catalyst for change in banking in the context of the current Digital Society. Phd. Ricardo Palomo, Full Professor of Finance, Deputy Chancellor for Digital Transformation at Universidad CEU San Pablo, Madrid, Spain and member of the Board of Alastria Blockchain Ecosytem This book provides a detailed and original overview of the most important fintech business models in the major global markets. Through a savvy use of the well-known Business Model Canvas methodology, the author explores the unique ecosystem, business model's components, and sources of competitive advantage of successful fintech firms. The book, in particular, offers an insightful and comprehensive analysis of the winning and losing strategies and performances of fintech firms by segment of activity such as, instant digital payments, crowd-funding, robo-advisory, alternative finance, credit & factoring, social trading, personal finance management, blockchain and cryptocurrencies. It is indeed a very unique and valuable study on the fintech industry, its trends, and its emerging business models. Prof. Ivo Pezzuto, The International School of Management, Paris, France and Adjunct Professor of International Business and Strategic Management Università Cattolica del Sacro Cuore, Department of Business Management, Milan, Italy The emergence of fintechs is one of the most relevant drivers of change in the

financial services industry. The book presented here delivers an impressing overview of fintechs' activity areas, business models and funding patterns. The book reflects the state of the art of the current fintech world. Prof. Dr. Jürgen Moormann, Professor of Bank and Process Management at Frankfurt School of Finance & Management, Germany

Indigo children are bright, intuitive, strong-willed, and sometimes self-destructive individuals. They are often labeled (and misdiagnosed) as having ADD or ADHD because they won't comply with established rules and patterns; and they may exhibit behavioral problems at home and at school. In The Care and Feeding of Indigo Children, Doreen Virtue, Ph.D., explores the psyche of these special kids and offers alternative solutions to Ritalin based on her extensive research and interviews with child-care experts, teachers, parents, and the Indigo Children themselves. Read the accounts of these remarkable children as they explain why they act-out, are aggressive or withdrawn; and what they want from the adults in their lives. You'll also be fascinated by the psychic experiences that these kids have had in their lives so far. This is a groundbreaking book that can positively affect the ways in which you interact with your child, altering the shape of their future in miraculous ways.

This book highlights the latest research articles presented at the second Digital Marketing & eCommerce Conference in June 2021. Papers include a diverse set of digital marketing and eCommerce-related topics such as sser psychology and behavior in social commerce, influencer marketing in social commerce, social media monetization strategies, social commerce characteristics and their impact on user behavior, branding on social media, social media-based business models, user privacy and security protection on social media, social video marketing and commerce, among other topics.
