Serves as the premier resource for learning the new techniques and applications of NMR spectroscopy Provides a key reference for chemists and physicists using NMR spectroscopy to study the structure and dynamics of molecules Covers all aspects of molecular science, including MRI (Magnetic Resonance Imaging)

The Congressional-Executive Commission on China is tasked with monitoring China's compliance with human rights, particularly those contained in the International Covenant on Civil and Political Rights and in the Universal Declaration of Human Rights, as well as monitoring the development of the rule of law in China. As part of its mandate, the Commission issues an annual report every October, covering the preceding 12-month period and including recommendations for U.S. legislative or executive action. This volume contains the 2016 report.

Solar power has taken a journey from what was once considered the lunatic fringe to mainstream society and industry. Looking specifically at the Solex project in Carnarvon, Western Australia, which pioneered the harvest of solar energy, this book offers an introduction to the development of renewable energy and the rise of dispersed, embedded solar energy systems in Australia in the early 2000s. Fullarton shows how a practical demonstration of innovative existing technology can have an incredible impact on a national scale. The ideas behind the Solex project were adopted by the broader community and were eventually taken up enthusiastically by the general population of Australia. Analyzing government and utility policies throughout the 2000s, the book traces how ambivalence was followed by wholehearted incentives to the roll-out of alternative energy and then by active opposition to alternative energy in favor of traditional fossil fuel as government philosophies changed.

This book constitutes the thoroughly refereed post-conference proceedings of the 18th Japanese Conference on Discrete and Computational Geometry and Graphs, JDCDGG 2015, held in Kyoto, Japan, in September 2015. The total of 25 papers included in this volume was carefully reviewed and selected from 64 submissions. The papers feature advances made in the field of computational geometry and focus on emerging technologies, new methodology and applications, graph theory and dynamics. This proceedings are dedicated to Naoki Katoh on the occasion of his retirement from Kyoto University.

Includes the Committee's Technical reports no. 1-1058, reprinted in v. 1-37.

The AREAER provides a description of the foreign exchange arrangements, exchange and trade systems, and capital controls of all IMF Member countries.
