This book covers a wealth of knowledge from experts and informed stakeholders on the best ways to understand, prevent, and control fall-related risk exposures. Featured are subjects on: (1) a public health view of fall problems and strategic goals; (2) the sciences behind human falls and injury risk; (3) research on slips, trips and falls; (4) practical applications of prevention and protection tools and methods in industrial sectors and home/communities; (5) fall incident investigation and reconstruction; and (6) knowledge gaps, emerging issues, and recommendations for fall protection research and fall mitigation.

Surpassing the standard set by the first edition, Healthcare Hazard Control and Safety Management, Second Edition presents expansive coverage for healthcare professionals serving in safety, occupational health, hazard materials management, quality improvement, and risk management positions. Comprehensive in scope, the book covers all major issues i
