Concepts of Earth and Chemistry Course Description This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student; materials for each semester are independent of one another to allow flexibility. Semester 1: Earth Blending a creationism perspective of history with definitions of terms and identification of famous explorers, scientists, etc., this book gives students an excellent initial knowledge of people and places, encouraging them to continue their studies in-depth. Semester 2: Chemistry Chemistry is an amazing branch of science that affects us every day, yet few people realize it, or even give it much thought. Without chemistry, there would be nothing made of plastic, there would be no rubber tires, no tin cans, no televisions, no microwave ovens, or something as simple as wax paper. This book presents an exciting and intriguing tour through the realm of chemistry as each chapter unfolds with facts and stories about the discoveries of discoverers. Find out why pure gold is not used for jewelry or coins. Join Humphry Davy as he made many chemical discoveries, and learn how they shortened his life. See how people in the 1870s could jump over the top of the Washington Monument. Exploring the World of Chemistry brings science to life and is a wonderful learning tool with many illustrations and biographical information.

** Jesus' disciples had an amazing and unique opportunity to walk with God Himself as they did life and ministry with Jesus. Stephen De La Vega's 12 Answers that Rock this World gives us a window into what it would have been like to walk in the shoes of the twelve men who lived most closely with Jesus. This study puts us into the minds of Jesus' apprentices as we wrestle with the questions that came out of their mouths as they journeyed with their Messiah. ABOUT THE SERIES Jesus invited the 12 disciples to follow Him, to be His inner circle. For three years they walked and talked with Him. Jesus taught them and He explained His plan. They witnessed firsthand His compassion, His miracles, and how He focused on His mission. While they listened and while they watched, the disciples wondered. They watched Jesus say and do things out of the ordinary. He was unconventional and untraditional, yet He was always right. They pondered His ways with amazement, and they had questions. Matthew cites 12 of their questions in his gospel account. Jesus' answers tell us about people. They help us understand people, ourselves, what we can be, and what is really important to Him. Jesus' answers rocked the world of the disciples, and they still rock our world today. (This series is divided into 12 sessions, each session covering one of Jesus' answers.)

Do we know what it means to question well? We need not fear questions, but by the grace of God, we have the safety and security to rush headlong into them and find ourselves better for it on the other side. Faith isn't the sort of thing that will endure as long as our eyes are closed. The opposite is the case: Faith helps us see, and that means not shrinking from the ambiguities and the difficulties that provoke our most profound questions. In our embrace of questioning, we must learn to question well. In our uncertainty, we must not give up the task of walking worthy of the calling that Christ has placed upon us. For we have not yet reached the end of our exploring. This book is written to aid you in faithfully questioning your foundations.
