The AO Spine curriculum is a framework based on entrustable professional activities (EPA's). An EPA is an essential activity that can be entrusted only to those who have acquired the requisite ability to work independently in a given healthcare context to achieve a desired outcome. The AO Spine curriculum focusses on the final level of autonomy, independent practice, which is the level at which surgeons perform their clinical activities.

write an in-depth book on spinal surgery, but one which will help the surgeon in the use of AO concepts and implants. We consider the practical courses held all over the world essential for the teaching of sound techniques so that technical complications and poor results can be avoided for both the surgeon and, in particular the patient. This book is a practical manual and an outline of what is taught in the courses. It is intended to help the young spinal surgeon to understand the correct use of AO implants. The indications given will aid the correct use of each procedure. . It must be strongly emphasized that surgery of the spine is technically demanding. The techniques described in this book should only be undertaken by surgeons who are trained and experienced in spinal surgery. Certain techniques, in particular pedicle screw fixation and cages, have not yet been fully approved by the FDA in the United States. However,
