Part of the SAGE Text/Reader Series in Criminology and Criminal Justice, this book provides an overview of the field of policing, including a collection of carefully selected classic and contemporary articles that have previously appeared in leading journals, along with original material in a mini-chapter format that contextualizes the concepts. It provides strong coverage on the basics of policing plus current and relevant topics such as female, gay and lesbian, and racial/ethnic minorities officers, policing issues in both rural and urban settings, police misconduct, accountability and ethics, and more.

The subject of police accountability includes some of the most important developments in American policing: the control of officer-involved shootings and use of force; citizen complaints and the best procedures for handling them; federal 'pattern or practice' litigation against police departments; allegations of race discrimination; early intervention systems to monitor officer behavior; and police self-monitoring efforts. The Second Edition of The New World of Police Accountability covers these subjects and more with a sharp and critical perspective. It provides readers with a comprehensive description of the most recent developments and an analysis of what works, what reforms are promising, and what has proven unsuccessful. The book offers detailed coverage of critical incident reporting; pattern analysis of critical incidents; early intervention systems; internal and external review of citizen complaints; and federal consent decrees.

Archbold presents the findings of the first nationwide study of the use of risk management and police legal advising in some of the largest police agencies in the United States. She discusses the prevalence of risk managers and police legal advisors, factors associated with the adoption, role, and perceived impact of such programs on police liability, professionalism, and accountability. Archbold finds that most law enforcement agencies have adopted police legal advisors and/or risk managers in order to respond to the changes in their work environment. These legal advisors and risk managers work together with police management to modify department policies, training, and supervision over line officers with the aim of reducing liability risks.

This title provides comprehensive guidance on the practice, procedure, and rules of evidence applicable to all international criminal courts.

One of the most diverse and inclusive books for the policing course, Policing: The Essentials, focuses on core concepts and contemporary research to provide a foundational understanding of policing in the current climate of criminal justice.
