Art term paper is the expression about the visual arts or sculptures using words. It is nothing but a portrayal of the visual representation, converting the ocular presentations into research projects. Thus an art term paper can be either descriptive or critical. The basic ultimate purpose in writing such art term paper would be reviewing and evaluating the work made by others.

Everyone argues whether fine art and collectibles are a suitable investment with the potential for substantial appreciation. Art consultants are making a living from this concept. In my first book "Art as Investment: An Anthology of Academic Research Papers from the Past One Hundred Years," I published a few academic research papers on the subject, leaving readers to decide for themselves. I

did receive several comments with some thinking it was excellent and a few put off by the mathematics contained in modern economic research studies. In truth, you can skip the mathematics and still understand the results of the study and the reasoning behind its conclusions. Many felt that i had taken a biased approach and only published the papers I agreed with and abandoned the rest. In my new book, I have published more research papers and have also sought those research papers which were more current and contemporary. Again, I selected at random and simply looked for relevancy in the papers that I have published in my new book. The mathematics can be skipped and is simply used as an additional argument to bolster the academic researcher's conclusion. The content and conclusions are very clear in each paper even if you avoid the mathematics. I would not tamper with anyone's research finding and therefore provided no editing to the papers. They are here in their entirety. To simply quote excerpts or to eliminate parts of the paper or to substitute my own words would simply be wrong. In addition my understanding of each paper may be very different to how it appears to the reader. These academic research papers are simply tools to be used to get a better understanding of the issues and approaches. They should not be considered gospel and beyond refutation. They seemed very solid to me but then there are many ways of interpreting conclusions and results.

Knowledge, in and of itself is good. This additional information as developed by career academics can only enhance one's understanding as to whether or not art should be also considered as an investment vehicle and if so, is it an asset class worthy of investment. I have spoken with many collectors and the truth is that if you buy an expensive work of art, there always exists an investment component. The very same applies in buying a residence. It may primarily as a place to live, raise kids or simply a place to hide from the world, but at all times it is also a financial investment. anyone you speak to can always give you an estimate of the home they live in. You do not have to read the whole book. You can simply glance through it and read only those papers that appeal to you. It does not matter. Even if you come away with only one good idea, it is worthwhile examining this book.

In *Research in the Creative and Media Arts*, Desmond Bell looks at contemporary art and

design practice, arguing that research activity is now a vital part of the creative dynamic. Today, creative arts and media students are expected to develop a range of research competencies and critical capacities in their creative project work. This book plots the basis for a research culture in the creative and media arts. It provides an illuminating genealogy of artistic research, revealing the intimate connections between art and science over the centuries and identifying some of the founding figures of practice-based artistic research. Bell explores the research that artists undertake through a number of case studies, talking to a range of contemporary artists and media makers about their work and the role research plays in this. He also traces the dialogues between art practice and a range of other humanity disciplines, such as history, anthropology and critical theory. His analysis reveals how contemporary art practice is now so locked into a set of interlocutions about process and purpose that it increasingly resembles a research practice in and of itself. *Research in the Creative and Media Arts* is a comprehensive overview of the relationship between research and practice that is ideal for undergraduate and postgraduate students, as well as researchers in the fields of art and design, art history and visual culture.

'Art Practice as Research' presents a compelling argument that the creative and cultural inquiry undertaken by artists is a form of research. The text explores themes, practice, and contexts of artistic inquiry and positions them within the discourse of research.
