Asthma, Health, and Society A Public Health Perspective Edited by Andrew Harver. University of North Carolina at Charlotte, Charlotte Harry Kotes, Ohio University, Athens Asthma, Health, and Society is a comprehensive, current resource on this complex disease—its scope, human costs, and management—from a combined social ecology/public health perspective. This important and unique book proposes a concerted, multifaceted response and sets out the foundation for shaping this response, comprising individual and large-scale assessment, education, advocacy, and multiple forms of intervention. In clear, authoritative detail enhanced by figures, graphs, and references, contributors explain where universal standards need to be set, alliances need to be built (such as among agencies and institutions in a community), and what is currently known about: Pathophysiology, epidemiology, and social impact of asthma. Genetic and environmental factors; protective factors and risk markers. Effects in women, minorities, children, teens, and elders. Medical management, self-management, and home monitoring. Evidence-based interventions at the family, school, and community levels. Screening guidelines, compliance issues, and more. In the absence of a cure or clear-cut causes, Asthma, Health, and Society offers the most robust compilation of practical knowledge on its subject to benefit the range of public health and asthma professionals, researchers, teachers, and students

Respiratory disease is the most common reason for admission to intensive care, and advanced respiratory support is one of the most frequently used interventions in critically ill patients. A clear understanding of respiratory disease is the cornerstone of high quality intensive care. Although a plethora of literature is available, both in print and online, finding the necessary relevant information can be difficult and time consuming. This handbook provides comprehensive clinical detail in an easily readable format. It is written by practising clinicians and has both in-depth theoretical discussion and practical management advice. The book is divided into sections: Section 1 deals with the approach to the patient with respiratory failure - including pathophysiology, investigation and diagnosis Sections 2 covers non invasive treatment modalities Sections 3 and 4 examine invasive ventilation in detail. Section 3 considers the principles of mechanical ventilation while section 4 deals with individual ventilator modes Section 5 discusses the management of the ventilated patient including sedation, monitoring, asynchrony, heart - lung interaction, hypercapnia and hypoxia, complications, weaning and extubation. It also has chapters on areas less frequently covered such as humidification, suction, tracheal tubes and principles of physiotherapy Section 6 is a comprehensive breakdown of each respiratory condition seen in ICU. This book is designed to bridge the gap between Intensive Care starter texts and all-encompassing reference textbooks. It is aimed at consultants and senior trainees in Intensive Care Medicine, senior ICU nursing staff, consultants in other specialities and allied healthcare professionals who have an interest in advanced respiratory critical care.

Intended for a multidisciplinary team of providers, Teaching Strategies for Health Care and Health establishes a foundation of how, why, what, and when people of all ages learn and how learning can positively affect a patient, a family, and a diverse community ' s ability to understand, manage, prevent and live well with their illness. Designed to give health professionals the tools they need to provide total patient care, this unique resource presents a foundation as well as a selection of tools and teaching methodologies to promote health and prevention of illness. Unique to this resource are experience driven case studies demonstrating both successful and unsuccessful cases, helping health care professionals identify best practices to preserve and repeat, as well as analyze why unsuccessful efforts might have failed and how those cases could be handled differently.
