Deployment of weapons by India and Pakistan, noncompliance with safeguards by North Korea and Iran, and the threat of nuclear terrorism have weakened the image of the Nonproliferation Treaty. And

Yearly challenges: Turkey borders Iraq, Syria, and Iran—all states with nuclear or WMD ambitions or capabilities. As a NATO member, Turkey also hosts U.S. nuclear bombs on its territory, although some question the durability of this relationship. This dynamic has naturally led to speculation that Turkish leaders might someday consider moving beyond a civilian course to develop nuclear weapons. Yet there has been remarkably little informed analysis and debate on Turkey's nuclear future, either within the country or in broader international society. This volume explores the current status and trajectory of Turkey's nuclear program, adding historical perspective, analytical rigor, and strategic insight.
