They will find out what elevator mechanics do each day, what kind of education is required to become an elevator mechanic, and much more. Includes table of contents, author biography, sidebars, glossary, index, and informative backmatter.

The history of automobiles is not just the story of invention, manufacturing, and marketing; it is also a story of repair. *Auto Mechanics* opens the repair shop to historical study—for the first time—by tracing the emergence of a dirty, difficult, and important profession. Kevin L. Borg's study spans a century of automotive technology—from the horseless carriage of the late nineteenth century to the "check engine" light of the late twentieth. Drawing from a diverse body of source material, Borg explores how the mechanic's occupation formed and evolved within the context of broad American fault lines of class, race, and gender and how vocational education entwined these tensions around the mechanic's unique expertise. He further shows how aspects of the consumer rights and environmental movements, as well as the design of automotive electronics, reflected and challenged the social identity and expertise of the mechanic. In the history of the American auto mechanic, Borg finds the origins of a persistent anxiety that even today accompanies the prospect of taking one's car in for repair.

This book constitutes the refereed proceedings of the 7th European Conference on Technology Enhanced Learning, EC-TEL 2012, held in Saarbrücken, Germany, in September 2012. The 26 revised full papers presented were carefully reviewed and selected from 130 submissions. The book also includes 12 short papers, 16 demonstration papers, 11 poster papers, and 1 invited paper. Specifically, the programme and organizing structure was formed through the themes: mobile learning and context; serious and educational games; collaborative learning; organisational and workplace learning; learning analytics and retrieval; personalised and adaptive learning; learning environments; academic learning and context; and, learning facilitation by semantic means.
