performance, safety, and shop tools. Structured around the eight ASE automotive test areas, this book helps users prepare for ASE certification.

The Lab Manual to accompany Automotive Service, 5e lets students put their knowledge of automotive systems to work. Activity sheets reinforce theory learned in the core text through parts identification exercises, matching exercises, and fill-in sheets. The second part of the Lab Manual includes a wide variety of hands-on worksheets that emphasize practical, real-life skills needed to service today's automobiles. References to current NATEF Standards are included on all relevant worksheets.

This complete textbook provides detailed content on the theory of operation, diagnosis, repair, and rebuilding of

Emissions inspection and maintenance (I/M) programs subject vehicles to periodic inspections of their emission control systems. Despite widespread use of these programs in air-quality management, policy makers and the public have found a number of problems associated with them. Prominent among these issues is the perception that emissions benefits and other impacts of I/M programs have not been evaluated adequately. *Evaluating Vehicle Emissions Inspection and Maintenance Programs* assesses the effectiveness of these programs for reducing mobile source

emissions. In this report, the committee evaluates the differences in the characteristics of motor vehicle emissions in areas with and without I/M programs, identifies criteria and methodologies for their evaluation, and recommends improvements to the programs. Most useful of all, this book will help summarize the observed benefits of these programs and how they can be redirected in the future to increase their effectiveness.

In 'Service Advising and Management', students gain the communication, customer service, and automotive knowledge they need to balance competing demands from customers, technicians, and shop management to become successful service advisors.
