Winner of the Financial Times and McKinsey Business Book of the Year Award 2018 “You will not want to put this riveting, masterfully reported book down. No matter how bad you think the Theranos story was, you’ll learn that the reality was actually far worse.” Bethany McLean, bestselling coauthor of The Smartest Guys in the Room and All the Devils Are Here A New York Times bestseller to be adapted into a film with Jennifer Lawrence to star. In 2014, Theranos founder and CEO Elizabeth Holmes was widely seen as the female Steve Jobs: a brilliant Stanford dropout whose startup ‘unicorn’ promised to revolutionize the medical industry with a machine that would make blood tests significantly faster and easier. Backed by investors such as Larry Ellison and Tim Draper, Theranos sold shares in a fundraising round that valued the company at \$9 billion, putting Holmes’s worth at an estimated \$4.7 billion. There was just one problem: the technology didn’t work. For years, Holmes had been misleading investors, FDA officials, and her own employees. When Carreyrou, working at the Wall Street Journal, got a tip from a former Theranos employee and started asking questions, both Carreyrou and the Journal were threatened with lawsuits. Undaunted, the newspaper ran the first of dozens of Theranos’ articles in late 2015. By early 2017, the company’s value was zero and Holmes faced potential legal action from the government and her investors. In Bad Blood John Carreyrou tells the story of Theranos, and encourages us to consider the possible repercussions of our blind faith in a small group of brilliant individuals. PRAISE FOR BAD BLOOD "A dazzling story of deception in Silicon Valley. . .It is a tale of heroic cupidity on a scale that made the very best and the very brightest look like the very, very foolish . . . New York Times Book Review "Carreyrou presents the scientific, human, legal and social sides of the story in full. Although some of it was previously reported in his extensive coverage, he unveils many dark secrets of Theranos that have not previously been laid bare." Nature "His [Carreyrou's] unmasking of Theranos is a tale of David and Goliath." Financial Times

"Hell is empty, and all the devils are here." -Shakespeare, The Tempest As soon as the financial crisis erupted, the finger-pointing began. Should the blame fall on Wall Street, Main Street, or Pennsylvania Avenue? On greedy traders, misguided regulators, sleazy subprime companies, cowardly legislators, or clueless home buyers? According to Bethany McLean and Joe Nocera, two of America's most acclaimed business journalists, the real answer is all of the above-and more. Many devils helped bring hell to the economy. And the full story, in all of its complexity and detail, is like the legend of the blind men and the elephant. Almost everyone has missed the big picture. Almost no one has put all the pieces together. All the Devils Are Here goes back several decades to weave the hidden history of the financial crisis in a way no previous book has done. It explores the motivations of everyone from famous CEOs, cabinet secretaries, and politicians to anonymous lenders, borrowers, analysts, and Wall Street traders. It delves into the powerful American mythology of homeownership. And it proves that the crisis ultimately wasn't about finance at all; it was about human nature. Among the devils you'll meet in vivid detail: • Angelo Mozilo, the CEO of Countrywide, who dreamed of spreading homeownership to the masses, only to succumb to the peer pressure-and the outsized profits-of the sleaziest subprime lending. • Roland Arnall, a respected philanthropist and diplomat, who made his fortune building Ameriquent, a subprime lending empire that relied on blatantly deceptive lending practices. • Hank Greenberg, who built AIG into a Rube Goldberg contraption with an undeserved triple-A rating, and who ran it so tightly that he was the only one who knew where all the bodies were buried. • Stan O'Neal of Merrill Lynch, aloof and suspicious, who suffered from "Goldman envy" and drove a proud firm into the ground by promoting cronies and pushing out his smartest lieutenants. • Lloyd Blankfein, who helped turn Goldman Sachs from a culture that famously put clients first to one that made clients secondary to its own bottom line. • Franklin Raines of Fannie Mae, who (like his predecessors) bullied regulators into submission and let his firm drift away from its original, noble mission. • Brian Clarkson of Moody's, who aggressively pushed to increase his rating agency's market share and stock price, at the cost of its integrity. • Alan Greenspan, the legendary maestro of the Federal Reserve, who ignored the evidence of a growing housing bubble and turned a blind eye to the lending practices that ultimately brought down Wall Street-and inflicted enormous pain on the country. Just as McLean's The Smartest Guys in the Room was hailed as the best Enron book on a crowded shelf, so will All the Devils Are Here be remembered for finally making sense of the meltdown and its consequences.

An account of the experiment conducted by the U.S. Public Health Service describes how medical treatment was withheld from Black sharecroppers infected with syphilis

Named a Best Book of 2018 by the Financial Times and Fortune, this “thrilling” (Bill Gates) New York Times bestseller exposes how a “modern Gatsby” swindled over \$5 billion with the aid of Goldman Sachs in “the heist of the century” (Axios). Now a #1 international bestseller, BILLION DOLLAR WHALE is “an epic tale of white-collar crime on a global scale” (Publishers Weekly, starred review), revealing how a young social climber from Malaysia pulled off one of the biggest heists in history. In 2009, a chubby, mild-mannered graduate of the University of Pennsylvania’s Wharton School of Business named Jho Low set in motion a fraud of unprecedented gall and magnitude—one that would come to symbolize the next great threat to the global financial system. Over a decade, Low, with the aid of Goldman Sachs and others, siphoned billions of dollars from an investment fund—right under the nose of global financial industry watchdogs. Low used the money to finance elections, purchase luxury real estate, throw champagne-drenched parties, and even to finance Hollywood films like The Wolf of Wall Street. By early 2019, with his yacht and private jet reportedly seized by authorities and facing criminal charges in Malaysia and in the United States, Low had become an international fugitive, even as the U.S. Department of Justice continued its investigation. BILLION DOLLAR WHALE has joined the ranks of Liar’s Poker, Den of Thieves, and Bad Blood as a classic harrowing parable of hubris and greed in the financial world.
