Winner of the prestigious Paul A. Samuelson Award for scholarly writing on lifelong financial security, John Cochrane's *Asset Pricing* now appears in a revised edition that unifies and brings the science of asset pricing up to date for advanced

students and professionals. Cochrane traces the pricing of all assets back to a single idea--price equals expected discounted payoff--that captures the macro-economic risks underlying each security's value. By using a single, stochastic discount factor rather than a separate set of tricks for each asset class, Cochrane builds a unified account of modern asset pricing. He presents applications to stocks, bonds, and options. Each model--consumption based, CAPM, multifactor, term structure, and option pricing--is derived as a different specification of the discounted factor. The discount factor framework also leads to a state-space geometry for mean-variance frontiers and asset pricing models. It puts payoffs in different states of nature on the axes rather than mean and variance of return, leading to a new and conveniently linear geometrical representation of asset pricing ideas. Cochrane approaches

empirical work with the Generalized Method of Moments, which studies sample average prices and discounted payoffs to determine whether price does equal expected discounted payoff. He translates between the discount factor, GMM, and state-space language and the beta, mean-variance, and regression language common in empirical work and earlier theory. The book also includes a review of recent empirical work on return predictability, value and other puzzles in the cross section, and equity premium puzzles and their resolution. Written to be a summary for academics and professionals as well as a textbook, this book condenses and advances recent scholarship in financial economics.

Several factors explain the growth of the so-called "sharing economy" in the tourism sector over recent years, including the 2010 global economic crisis, digitalization and

new trends in travellers' behaviour and preferences. This growth has been particularly notable in the accommodation industry. With the emergence of online platforms for short-term rentals, the market has been expanding at an unprecedented rate. Building upon UNWTO's 2017 publication *New Platform Tourism Services* (or the so-called Sharing Economy) - *Understand, Rethink and Adapt*, this report provides an analysis and benchmarking of 21 case studies in terms of the rules and regulations applied to the short-term rental market, focusing on three key areas: 1) fair competition; 2) consumer protection; and 3) planning and sustainability.

Now in its third edition, this is the only outsourcing and offshoring book to offer a broad but coherent guide to the strategy, operations and management of ITO and BPO outsourcing and offshoring, from how to source new relationships to managing business processes in a national and global context.

The global offshore outsourcing market for IT and business services exceeded \$55 billion in 2008 and some estimates suggest an annual growth rate of 20% over the next five years. Furthermore, over 200 firms from the Forbes 2000 companies and 50 per cent of the Fortune Global 500 had offshored IT and business process activities through captive centres, making a total of about \$9bn of business. The phenomenon of offshoring and offshore-outsourcing is certainly expanding. It has become increasingly important to understand the phenomenon, not least as a basis for suggesting what directions it will take, its impacts, how it has been conducted, and how its management can be better facilitated. This book offers a broad perspective on various issues relating to the sourcing of systems and business processes in a national and global context. The authors examine both the client's and the vendor's involvement in sourcing

relationships by putting the emphasis on the capabilities that each side should develop prior to entering a relationship but also that they should develop as a result of their interactions with each other.
