THE KING spans a writing career of more than thirty years during which Donner slowly developed from chess player-writer into writer-chess player. Donner's favourite themes are: Bobby Fischer, the blunder, chess as a game of luck, why women can't play chess, madness, and poor Lodewijk Prins, his rival for the Dutch National Championship for many years, who, according to Donner, "couldn't tell a bishop from a knight." 'THE KING' is a book full of insults and ironies, but Donner wouldn't be Donner without a considerable amount of self-mockery. "After I resigned the last game with perfect self-control and solemnly shook hands with my opponent in the best of Anglo-Saxon traditions, I rushed home where I threw myself onto my bed, howling and screaming, and pulled the blankets over my face."

An authoritative guide illustrates the basic techniques of chess play as well as the tactical strategy of professional games

Mastering Positional Chess is a serious, but entertaining chess instruction book. Daniel started writing it when he realized that his lack of positional understanding was causing him to lose many games.

Mikhail Tal, the 'magician from Riga,' was the greatest attacking World Champion of them all, and this enchanting autobiography chronicles his extraordinary career with charm and humor. Dazzling games are interspersed throughout with anecdotes and witty self-interviews, and in typically objective fashion he related both the downs and ups of his encounters. An inveterate smoker and drinker, Tal's life on the circuit was punctuated by bouts in the hospital with kidney problems, but nothing could dull his love for chess and his sheer genius on the chessboard. His illustrious tournament record, up to his death in 1992, is included here in full, along with 100 complete games and nearly as many positions. Tal's annotations in this book are a world apart from ordinary games collections. No reader could fail to be swept along by his passion and vitality as he sets the scene for an encounter and then recounts every psychological twist and turn.

Offers a guide to important chess techniques and principles to help players develop the skills needed to beat opponents, from the basics of play to specific tactics and strategies, as well as a look at the world of competitive chess.

Improve your chess by studying the greatest games of all time, from Adolf Anderssen's 'Immortal Game' to Magnus Carlsen's world championship victories, and featuring a foreword by five-times World Champion Vishy Anand. This book is written by an all-star team of authors. Wesley So is the reigning Fischer Random World Champion, the 2017 US Champion and the winner of the 2016 Grand Chess Tour. Michael Adams has been the top British player for the last quarter of a century and was a finalist in the 2004 FIDE World Championship. Graham Burgess is the author of thirty books, a former champion of the Danish region of Funen, and holds the world record for marathon blitz chess playing. John Nunn is a three-time winner of both the World Solving Championship and the British Chess Federation Book of the Year Award. John Emms is an experienced chess coach and writer, who finished equal first in the 1997 British Championship and was chess columnist of the Young Telegraph. The 145 greatest chess games of all time, selected, analysed, re-evaluated and explained by a team of British and American experts and illustrated with over 1,100 chess diagrams. Join the authors in studying these games, the cream of two centuries of international chess, and develop your own chess-playing skills - whatever your current standard. Instructive points at the end of each game highlight the lessons to be learned. First published in 1998, a second edition of The Mammoth Book of the World's Greatest Chess Games in 2004 included an additional twelve games. Another new edition in 2010 included a further thirteen games as well as some significant revisions to the analysis and information regarding other games in earlier editions of the book, facilitated by the use of a variety of chess software. This 2021 edition, further updated and expanded, now includes 145 games. The authors have made full use of the new generation of chess analysis engines that apply neural-network based AI.

For over 100 years, the world's leading chess players and teachers have told their students to study the endgame. Now, for the first time, a revolutionary, richly instructive endgame book has been designed for players of all levels. This is the one and only endgame book you'll need as you move up the ladder from beginner to tournament player and master. Designed to "speak" to a player in a very personal way, Silman's book teaches the student everything he or she needs to know at his or her current rating level, and builds on that knowledge for each subsequent phase of the player's development. Starting at the beginner's level, all basic mates are clearly and painstakingly explained. After that, the critical building blocks that form the endgame foundation for all tournament hopefuls and experienced tournament competitors are explored in detail. Finally, advanced endgame secrets, based on concepts rather than memorization, are presented in a way that makes them easy to master. The basic keys to a well-rounded endgame education -- Opposition, the Lucena and Philidor Positions, Cat and Mouse, Trebuchet, Fox in the Chicken Coup, Triangulation, Building a Box, Square of a Pawn, Outflanking, the Principle of Two Weaknesses -- are

vital. But equally important is creating a love of the endgame, which is addressed at the end of the book with a look at chess tactics, minor piece domination, and a discussion of the five greatest endgame players of all time -- all things that every fan of chess at every level can enjoy. If you have found the endgame to be a mystery, if you have found that your confidence plummets once you reach an endgame, if you have searched for an instructive endgame book that will turn your weakest link -- your endgame -- into your personal field of power, your search is over. The book is the key to a world of essential ideas, startling beauty, and stunning creativity.
