It conceptualizes "the good life" as a fulfilled life that is embedded in social relations and at peace with nature, independent of a mounting availability of resources. In bringing together experts from different fields, this book opens an interdisciplinary discussion that has often been restricted to

Philosophers, sociologists, economists and activists come together to discuss the political and social conditions of a good life in societies which no longer rely on economic growth and no longer call for an ever expanding circle of extraction, consumption, pollution, waste, conflict, and psychological burnout.
