Saraswati Information Technology Series for Classes IX and X is a complete resource for study and practice written in simple, easy-to-understand language. The student-friendly edition is entirely based on the curriculum prescribed under NSQF for vocational courses. The series provides useful tools to learn theory and do practical at ease. Designed to meet student's needs, it provides sound practice through a wide variety of solved and unsolved exercises based on the latest examination pattern. The series covers the complete syllabus laid down by CBSE.

"Founded in 1954, Bharat Electronics was among the early public sector enterprises set up by the Government of India. The original mandate for the company was to produce electronics equipment, primarily for India's defence, with the overall objective being eventual self-reliance in electronics. The company's journey, through many vicissitudes over the years, to becoming one of the top technology companies in India today is the story of this book. Bharat Electronics is not generally known to the public, its role being primarily a supplier of the 'eyes and ears' of the defence forces. It had also played a key role in spreading radio and television across all corners of the country. And, its million plus tamper-proof Electronic Voting Machines keep the wheels of the world's largest democracy spinning. Despite all the changes in policies that India has witnessed, public sector enterprises continue to play an important role in the economy of India, contributing 22% of the gross domestic product today. To many who believe that the government has no business to be in business, a successful public sector enterprise like Bharat Electronics is a conundrum. 'Inside the Solid State' is proof enough that state ownership and good performance are not contradictory."--Front cover flap.

Emerging economies are expected to be in the driver's seat of the global economy in the medium and long term. Large multinational corporations will account for much of this activity. In this textbook, Andrei Panibratov explains how emerging market firms accumulate and exploit market knowledge to develop competitive advantages whilst operating globally. Chapters dedicated to the key emerging economies - Brazil, Russia, India and China (BRIC) - are enhanced by detailed case studies of large firms' activities. The book is divided into four parts, focusing on the following: An outline of the relevant terminology and the context of the international strategy of emerging market firms, providing an introductory foundation for the whole book. A guide to the evolution of perspectives regarding international strategy, designed to illustrate the changes and trends in the recent academic research on internationalization. A country-by-country illustration of the internationalization of BRIC economies and firms, providing an overall picture of each country's global integration, outward investments, and strategies. The concepts and practices behind the strategies employed by different firms. Written by an established international business scholar, this book is essential reading for students of international strategy who wish to understand the importance of the emerging economies.
