From the moment that the M4 Sherman had been matched against German Panther and Tiger tanks, the American tank crews had known that their vehicles were outclassed by the opposition. What was needed was a more powerful tank, more heavily armed and armored, that could take-on the powerful German panzers on a more equal footing. Although it took time to develop by the latter months of the war numbers of M26 Pershing tanks were reaching the frontline US armored units. Well armored and with a powerful 90mm gun the Pershing was a match for any tank in the German order of battle.

You had better not monkey around when it comes to place value. The monkeys in this book can tell you why! As they bake the biggest banana cupcake ever, they need to get the amounts in the recipe correct. There ' s a big difference between 216 eggs and 621 eggs. Place value is the key to keeping the numbers straight. Using humorous art, easy-to-follow charts and clear explanations, this book presents the basic facts about place value while inserting some amusing monkey business.

Sophisticated medical instruments have provided us with a unique glimpse into the learning brain. As educators, we can take the knowledge and apply it to teaching in our classrooms. With the advantage of brain research, we have been able to develop instructional techniques that facilitate the brain's innate learning capacity. The more teachers know about how the brain learns, the more instructional options they have. Brain-Compatible Activities for Mathematics, Grades K-1 provides ready-to-use, brain-compatible lessons for mathematics instruction. Each step-by-step lesson includes detailed instructions for the teacher, maths activities, and all the necessary reproducibles. Correlated with the National Council of Teachers of Mathematics' standards and Focal Points, this classroom resource shows teachers how to apply the principles discussed in Sousa's bestseller, How the Brain Learns Mathematics.
