Biological psychology : an introduction to behavioral ...

Seventh Edition Highlights: 12 new headlines on topics ranging from gender and the Flynn effect to gender stereotyping that affects men Coverage of gender issues in aging adults and transgendered...

Gender: Psychological Perspectives, Seventh Edition ...

Great intro to biological psychology. I'd say the first 2/3 of this book is laying foundational material, and it becomes more applied toward the last 1/3. This is just fine, because the last 1/3 will make no sense without the first 2/3.

Electronic Tools for Translators offers complete explanations of a wide range of software products, information resources and online services that translators now need to understand and use. Individual chapters run through the origins and nature of the internet, the many ways of searching for information, and translation resources on the web, CD-ROMs as information sources, computer-assisted terminology management, the use and construction of corpora, translation memories, localization tools, and the incorporation of machine translation programmes into the translation process. Austermühl explains all these tools and resources in a clear, step-by-step way, suggesting learning tasks and activities for each chapter and guiding the reader through the jargon. Examples are drawn from English, French, German and Spanish. The book can be used as a text in regular classes on computer-assisted translation, in translation practice classes, as well as for self-learning by professionals wishing to update their skills.

These regional books cover electrical wiring in single family houses. They simplify the stated requirements for inspection in each province so that homeowners can safely, easily and confidently make their own electrical installations.

Every interventionist needs this practical sourcebook, packed with research-based strategies for helping parents and caregivers take a consistent, active role in supporting young children's development.

In an alternate frontier America, Eff must travel beyond the Great Barrier and come to terms with her magic abilities--and those of her twin brother--to stop the newest threat encroaching on the settlers.

For the increasing number of people diagnosed with dementia each year, treatment in the early stages can make a significant difference to their quality of life. This book provides examples of psychosocial interventions: taking into consideration the individual, social and environmental aspects of the person's life. It looks at ways of providing support at the time of diagnosis and goes on to explore a variety of interventions and services for the treatment of early dementia. Bringing together the knowledge and experiences of professionals from both the UK and Europe, the contributors describe interventions for both psychological and practical problems with case examples such as memory support groups, art therapies and assistive technologies for use in the home. This accessible book will be essential reading for practitioners and carers working with those with early dementia and will be extremely useful in both professional development and for those new to dementia care.

A self-contained introductory treatment of electric power systems. It first covers basic principles and then focuses on the electric power system under conditions of balanced operation. It also considers specific operating features and addresses balanced and unbalanced fault analysis.

The original inspiration for his most famous essay, "Acres of Diamonds", occurred in 1869 when Conwell was traveling in the Middle East. The central idea of the work is that one need not look elsewhere for opportunity, achievement, or fortune—the resources to achieve all good things are present in one's own community. This theme is developed by an introductory anecdote, credited by Conwell to an Arab guide, about a man who wanted to find diamonds so badly that he sold his property and went off in futile search for them. The new owner of his home discovered that a rich diamond mine was located right there on the property. Conwell elaborates on the theme through examples of success, genius, service, or other virtues involving ordinary Americans contemporary to his audience: "dig in your own backyard!". The book has been regarded as a classic of New Thought literature since the 1870s. Russell Conwell (1843-1925) was an American Baptist minister, orator, philanthropist, lawyer, and writer.
