~~The Biology Coloring Book by Robert D. Griffin: 6000 -~~

~~This book was a great supplement to my college biology class. My class is online, so I was using every additional resource I could get my hands on. As a visual learner, this book was invaluable to me. After each section in my textbook, I would complete the pictures in the coloring book. The lesson on the left summarizes the most important ...~~

Readers experience for themselves how the coloring of a carefully designed picture almost magically creates understanding. Indispensable for every biology student.

For high school biology students and college zoology students, as well as for all students of nature, this coloring book teaches the structure and function of the major animal groups, from simple to complex. Brief, informative texts accompany each drawing.

"Detailed drawings with thorough explanations of complex biology concepts and systems; New sections with memorization techniques, charts, and quick reference guides throughout; An easier and better way to learn biology.

This one of a kind coloring book will take you on an artistic voyage into the microscopic world of cells, the smallest units of life. Both art and science enthusiasts alike will be inspired by dozens of unique, hand drawn coloring pages that showcase the tiny building blocks that make up all living things. The illustrations highlight the fascinating shapes and patterns of cells from the brain, intestine, eye, lung, skin and placenta-even stem cells and cancer cells.Also included are stunning, full color photographs of the real cells that inspired the coloring pages, taken by university researchers, including the author herself, using the latest technology in microscope imaging. Color your way through the extraordinary hidden beauty of cells.A portion of the profits from the sale of this book will be donated to science/STEM education.

Learn the basics of chemistry through coloring. This book introduces the concepts of: The Periodic table Protons, electrons and neutrons Bohr models Orbitals Diatomic elements Covalent bonds Ionic bonds ...and more!

Following in the successful footsteps of the "Anatomy" and the "Physiology Coloring Workbook", The Princeton Review introduces two new coloring workbooks to the line. Each book features 125 plates of computer-generated, state-of-the-art, precise, original artwork--perfect for students enrolled in allied health and nursing courses, psychology and neuroscience, and elementary biology and anthropology courses.

The completely revised Human Evolution Coloring Book Provides an authoritative, scientific background for understanding the origins of humanity Includes new discoveries and information essential for students of anthropology, primatology, paleontology, comparative anatomy, and genetics Brings together evidence from living primates, fossils, and molecular studies Explains the latest dating methods, including radioactive, paleomagnetic, and molecular clocks Surveys the world of living primates, their ecology, locomotion, diet, behavior, and life histories Clarifies the anatomical and behavioral similarities and differences between ourselves and our closest living relatives, the chimpanzee and the gorilla Resolves some long-standing mysteries about our relationship to the extinct Neanderthals

THE NEWEST BOOK IN OUR EXPLORING SERIES, EXPLORING THE WORLD OF BIOLOGY IS A FACINATING LOOK AT LIFE - FROM THE SMALLEST PROTEINS AND SPORES, TO THE COMPLEX LIFE SYSTEMS OF HUMANS AND ANIMALS.

Learn biology while having fun with The Biology Student's Self-Test Coloring Book. Instead of reading lecture notes or textbooks, Barron's guide helps you learn biology interactively and retain information more effectively. Useful as a supplement to a biology class or on its own as a self-study guide, Barron's biology coloring book will help you master key concepts and structures.
