relationships between the main concepts of biology, so they are not learning facts about biology in isolation. Mader's Concepts of Biology was developed to fill this void. Organized around the main themes of biology, Concepts of Biology guides students to think conceptually about biology and the world around them. Just as the levels of biological organization flow from one level to the next, themes and topics in Concepts of Biology are tied to one another throughout the chapter, and between the chapters and parts. Combined with Dr. Mader's hallmark writing style, exceptional art program, and pedagogical

respected author Sylvia Mader has helped thousands of entry-level students understand and enjoy the principles of human anatomy and physiology. Beginning with the sixth edition, Susannah Longenbaker has been building on Dr. Mader's format and engaging writing style while adding her own personal touch to this successful title. The writing is clear, direct and user-friendly, and enriched with new clinical information, terminology and classroom-tested features such as "Focus on Forensics" readings and in-text "Content Check-Up" questions. Drawing on over twenty years of teaching experience, Sue Longenbaker

language to present the material as succinctly as possible, enabling students--even non-majors--to master the foundational concepts before coming to class. "Before You Begin", "Following the Themes", and "Thematic Feature Readings" piece together the three major themes of the text--evolution, nature of science, and biological systems. Students are consistently engaged in these themes, revealing the interconnectedness of the major topics in biology. Sylvia Mader typifies an icon of science education. Her dedication to her students, coupled with her clear, concise

writing-style has benefited the education of thousands of students over the past three decades. The integration of the text and digital world has been achieved with the addition of Dr. Michael Windelspecht's facility for the development of digital learning assets. For over ten years, Michael served as the Introductory Biology Coordinator at Appalachian State University--a program that enrolls over 4,500 non-science majors annually. Michael is the lead architect in the design of McGraw-Hill's Connect Plus and LearnSmart media content for the Mader series. These assets allow
