Biology, an authoritative text with a diverse author team, focuses on the process of evolution to explain biodiversity. The book emphasizes problem-solving and the scientific method in its approach to cutting-edge content. The use of historical and experimental approaches offers students not only a current view of the field, but more importantly, how it evolved. The authors have tried to keep as much historical context as possible and provide information within an experimental framework

The Living World is often considered a student favorite. George Johnson has written this non-majors textbook from the ground up to be an engaging and accessible learning tool with an emphasis on "how things work and why things happen the way they do". The Living World focuses on concepts rather than terminology and technical information, and features a straightforward, clear writing style

Free and a wide variety of media assets to enhance the content of the textbook. Every chapter of this 9th edition is focused directly on the relevance of its content to today's students. When the discussion of a topic is linked to a student's own experience, it does not seem so unapproachable, and the utility of learning it is far easier to accept.

Science competitions test a student's level of knowledge, power of scientific reasoning, and analytical thinking outside of the regular school curriculum. A systematic approach and smart study regimen are both required to get good results in science competitions. In this book, you will find many tips and tricks for
