Black Box Thinking: Marginal Gains and the Secrets of High Performance. November 11, 2017 - 11:10 am. If you had to boil down Matthew Seyd's Black Box Thinking: Marginal Gains and the Secrets of High Performance to four words it would be the fairly unexceptional sounding 'learn from your mistakes'. What makes it such a good read, however, is not only the lively range of examples but also the time he takes to probe into why people often don't learn from mistakes.

Nobody wants to fail. But in highly complex organizations, success can happen only when we confront our mistakes, learn from our own version of a black box, and create a climate where it's safe to fail. We all have to endure failure from time to time, whether it's underperforming at a job interview, flunking an exam, or losing a pickup basketball game. But for people working in safety-critical industries, getting it wrong can have deadly consequences. Consider the shocking fact that preventable medical error is the third-biggest killer in the United States, causing more than 400,000 deaths every year. More people die from mistakes made by doctors and hospitals than from traffic accidents. And most of those mistakes are never made public, because of malpractice settlements with nondisclosure clauses. For a dramatically different approach to failure, look at aviation. Every passenger aircraft in the world is equipped with an almost indestructible black box. Whenever there's any sort of mishap, major or minor, the box is opened, the data is analyzed, and experts figure out exactly what went wrong. Then the facts are published and procedures are changed, so that the same mistakes won't happen again. By applying this method in recent decades, the industry has created an astonishingly good safety record. Few of us put lives at risk in our daily work as surgeons and pilots do, but we all have a strong interest in avoiding predictable and preventable errors. So why don't we all embrace the aviation approach to failure rather than the health-care approach? As Matthew Syed shows in this eye-opening book, the answer is rooted in human psychology and organizational culture. Syed argues that the most important determinant of success in any field is an acknowledgment of failure and a willingness to engage with it. Yet most of us are stuck in a relationship with failure that impedes progress, halts innovation, and damages our careers and personal lives. We rarely acknowledge or learn from failure—even though we often claim the opposite. We think we have 20/20 hindsight, but our vision is usually fuzzy. Syed draws on a wide range of sources—from anthropology and psychology to history and complexity theory—to explore the subtle but predictable patterns of human error and our defensive responses to error. He also shares fascinating stories of individuals and organizations that have successfully embraced a black box approach to improvement, such as David Beckham, the Mercedes F1 team, and Dropbox.

The Sunday Times No.1 Bestseller From the Bestselling Author of Bounce What links the Mercedes Formula One team with Google? What links Team Sky and the aviation industry? What connects James Dyson and David Beckham? They are all Black Box Thinkers. Black Box Thinking is a new approach to high performance, a means of finding an edge in a complex and fast-changing world. It is not just about sport, but has powerful implications for business and politics, as well as for parents and students. In other words, all of us. Drawing on a dizzying array of case studies and real-world examples, together with cutting-edge research on marginal gains, creativity and grit, Matthew Syed tells the inside story of how success really happens - and how we cannot grow unless we are prepared to learn from our mistakes.

What links the Mercedes Formula One team with Google? What links Dave Braisford's Team Sky and the aviation industry? What is the connection between the inventor James Dyson and the footballer David Beckham? They are all Black Box Thinkers. Whether developing a new product, honing a core skill or just trying to get a critical decision right, Black Box Thinkers aren't afraid to face up to mistakes. In fact, they see failure as the very best way to learn. Rather than denying their mistakes, blaming others or attempting to spin their way out of trouble, these institutions and individuals interrogate errors as part of their future strategy for success. How many of us, hand on heart, can say that we have such a healthy relationship with failure? Learning from failure has the status of a cliché, but this book reveals the astonishing story behind the most powerful method of learning known to mankind, and reveals the arsenal of techniques wielded by some of the world's most innovative organizations. Their lessons can be applied across every field - from sport to education, from business to health. Using gripping case studies, exclusive interviews and really practical takeaways, Matthew Syed - the award-winning journalist and best-selling author of Bounce - explains how to turn failure into success, and shows us how we can all become better Black Box Thinkers.

Ideas are everywhere, but those with the greatest problem-solving, business-transforming, and life-changing potential are often hard to identify. Even when we recognize good ideas, applying them to everyday obstacles—whether in the workplace, our homes, or our civic institutions—can seem insurmountable. According to Matthew Syed, it doesn't have to be this way. In Rebel

Ideas, Syed argues that our brainpower as individuals isn't enough. To tackle problems from climate change to economic decline, we'll need to employ the power of "cognitive diversity." Drawing on psychology, genetics, and beyond, Syed uses real-world scenarios including the failings of the CIA before 9/11 and a communication disaster at the peak of Mount Everest to introduce us to the true power of thinking differently. Rebel Ideas will strengthen any kind of team, while including advice on how, as individuals, we can embrace the potential of an "outsider mind-set" as our greatest asset. Matthew Syed is the Sunday Times bestselling author of Black Box Thinking, Bounce, and The Greatest. He writes an award-winning newspaper column in The Times and is the host of the hugely successful BBC podcast Flintoff, Savage and the Ping Pong Guy.

Sound for Moving Pictures presents a new and original sound design theory called the Four Sound Areas framework, offering a conceptual template for constructing, deconstructing and communicating all types of motion picture soundtracks; and a way for academics and practitioners to better understand and utilize the deeper, emotive capabilities available to all filmmakers through the thoughtful use of sound design. The Four Sound Areas framework presents a novel approach to sound design that enables the reader to more fully appreciate audience emotions and audience engagement, and provides a flexible, practical model that will allow professionals to more easily create and communicate soundtracks with greater emotional significance and meaning. Of obvious benefit to sound specialists, as well as motion picture professionals such as film producers, directors and picture editors, Sound for Moving Pictures also provides valuable insight for others interested in the subject; such as those involved with teaching soundtrack analysis, or those researching the wider topics of film studies and screen writing.

Of the 200,000 years homo sapiens has been wandering this planet, this has to be the most absurd and challenging time to be a man... How can you hunt and gather in an open-plan office? Is monogamy fighting a losing battle against testes size? Why do men make up 95% of FTSE CEOs yet 95% of the prison population? Trapped in bodies barely changed since caveman days, males are now contending with corporate culture, lifelong commitment, rampant depression and crazy expectations to be a success at work and home. Enter award-winning BBC broadcaster and journalist Tim Samuels with Who Stole My Spear? - which stops at nothing to explore how men should actually be living these days. From relationships, religion, and the rise of ISIS, to porn, fatherhood and the oppression of office life. Nothing is taboo: Is it less serious when a man has an affair? Why don't new parents want boys? Who Stole My Spear? is an inspiring rallying call for men and 'good masculinity' which cannot be ignored - that will leave you rethinking much about life's big questions. And for women who wonder what's on a man's mind, this is the book that offers the entertainingly explosive answer.
