Blackstone's Police Manual on Evidence and Procedure is the leading text on police law, and the only official reference work for police officers preparing for promotion examinations and for probationary officers. It covers all aspects of evidence law and procedure from a police officer's perspective. The 2005 edition has been extensively revised to incorporate all legislative developments such as the Criminal Justice Act 2003, the Sexual Offences Act 2003, and the Anti-Social Behaviour Act 2003, and a number of case decisions and changes in policy. Blackstone's Police Manuals have become the best-selling police reference text in the UK. In addition to being the only official study guide for the police promotion examination in England and Wales, and the recognised text for police probationers, the Manuals have quickly established themselves as the definitive source for all who are involved in police law and procedure. Endorsed by Central Police Training and Development Authority, the Manuals have been written in consultation with police force in England and Wales, incorporating views from Detective schools, Driver Training Centres, and operational officer and police managers countrywide. This new edition focuses on Evidence and Procedure and covers key topics including: summonses and warrants; bail; court procedure and witnesses; youth justice and youth crime and disorder; evidence, incorporating exclusion of admissible evidence, and the disclosure of evidence; interviews; and custody officers' duties. It has also been revised and updated and includes new questions on important areas of the law.

This practical handbook offers guidance on good practice in core policing areas. It draws together practical advice across a

wide range of police duties, along with extracts and explanations of official policy and guidance from ACPO, the National Policing Improvement Agency and the National Centre for Policing Excellence.

The only official books for police officers preparing for the NPPF Step Two Legal Examination, containing the syllabus on which the examinations are based. Endorsed by the College of Policing, these are the most effective revision books for exam candidates.

An insight into one of the most disturbing and under-reported issues to affect ethnic minorities in the UK. Through an assessment of diversity literature and interviews with police officers, it highlights the limited commitment to fulfilling McPherson's recommendations and the value of diversity training to operational policing. Against the backdrop of black deaths in police custody, the book questions the extent to which institutionalised racism has been genuinely challenged - and offers an effective agenda for change.

This book is concerned to explore the changing role of the Parole Board across the range of its responsibilities, including the prediction of risk and deciding on the release (or continued detention) of the growing number of recalled prisoners and of those subject to indeterminate sentences. In doing so it aims to rectify the lack of attention that has been given by lawyers, academics and practitioners to 'back door sentencing' (where the real length of a sentence is decided by those who take the decision to release) compared to 'front door sentencing' (decisions taken by judges or magistrates in court). Particular attention is given in this book to the important changes made to the role and working of the Parole Board as a result of the impact of the early release scheme of the Criminal Justice Act 2005, with the Parole Board now deciding in Panels concerned with determinate sentence prisoners, lifers and recalled prisoners. A wide range of significant issues, and case law, has arisen as a result of these changes, which the contributors to this book, leading authorities in the field, aim to explore.

Policing is in a profound period of change, the result of recent government reform, a renewed drive for professionalism as well as the need to adapt to a rapidly changing society. This book provides a highly readable and up to date introduction to the work of the police, exploring what this currently involves and the directions it may be going in. It is designed for student police officers starting their probation and training, students studying public or uniformed service courses in colleges, students taking undergraduate courses in policing and criminal justice, and anybody else who wants to know about policing today. The book describes all the key elements of policing work. The first two parts look at how the police functions as an organization, with chapters devoted to important new areas of crime reduction partnerships and forensic support in investigation and enforcement. The third section covers key aspects of practical police work, with coverage of such challenging areas as anti-social behaviour and terrorism. The book contains a wide range of practical tasks and activities, and links are made throughout to the new Initial Police Learning and Development Programme and National Occupational Standards in Policing.

Michael Josephson discusses ethical values and decision-making techniques as he explores the everyday pressures that can compromise our integrity.
