Discover the secret history of America's submarine warfare in this fast-paced and deeply researched chronicle of adventure and intrigue during the Cold War that reads like a spy thriller. Blind Man's Bluff is an exciting, epic story of adventure, ingenuity, courage, and disaster beneath the sea. This New York Times bestseller reveals previously unknown dramas, such as: The mission to send submarines wired with self-destruct charges into the heart of Soviet seas to tap crucial underwater telephone cables. How the Navy's own negligence may have been responsible for the loss of the USS Scorpion, a submarine that disappeared, all hands lost, in 1968. The bitter war between the CIA and the Navy and how it threatened to sabotage one of America's most important undersea missions. The audacious attempt to steal a Soviet submarine with the help of eccentric billionaire Howard Hughes, and how it was doomed from the start. A magnificent achievement in investigative reporting, Blind Man's Bluff reads like a spy thriller, but with one important difference—everything in it is true.

This real-life Hunt for Red October is a story Naval Intelligence doesn't want you to know: the dramatic history of America's highly clandestine, dangerous, and sometimes deadly submarine espionage missions, from the Cold War thorough the Clinton administration.

Includes a new afterword describing submariners' responses and reactions and a new appendix of all award-winning subs honored for service in Cold War espionage operations. With 16 pages of black-and-white photos

“Red November delivers the real life feel and fears of submariners who risked their lives to keep the peace.” —Steve Berry, author of *The Paris Vendetta* W. Craig Reed, a former navy diver and fast-attack submariner, provides a riveting portrayal of the secret underwater struggle between the US and the USSR in Red November. A spellbinding true-life adventure in the bestselling tradition of *Blind Man's Bluff*, it reveals previously undisclosed details about the most dangerous, daring, and decorated missions of the Cold War, earning raves from New York Times bestselling authors David Morrell, who calls it, “palpably gripping,” and James Rollins, who says, “If Tom Clancy had turned *The Hunt for Red October* into a nonfiction thriller, Red November might be the result.”

Documents the true story of a rogue Soviet submarine's 1968 attempt to provoke a war between the U.S. and China by firing a missile off the coast of Hawaii, in an account that offers insight into the subsequent cover-up and the event's influence on U.S. negotiations with the USSR and China. Reprint.

Documents the story of a covert submarine espionage operation against the Soviet Union during the cold war as experienced by a commanding officer of the U.S.S. Blackfin, a submarine that faced extraordinarily high risks in the Soviet-controlled waters north of the Arctic Circle.

A writer's humorous and often-heartbreaking tale of losing his sight—and how he hid it from the world. At age sixteen, James Tate Hill was diagnosed with Leber's hereditary optic neuropathy, a condition that left him legally blind. When high-school friends stopped calling and a disability counselor advised him to aim for C's in his classes, he tried to escape the stigma by pretending he could still see. In this unfailingly candid yet humorous memoir, Hill discloses the tricks he employed to pass for sighted, from displaying shelves of paperbacks he read on tape to arriving early on first dates so women would have to find him. He risked his life every time he crossed a street, doing his best to listen for approaching cars. A good memory and pop culture obsessions like Tom Cruise, Prince, and all things 1980s allowed him to steer conversations toward common experiences. For fifteen years, Hill hid his blindness from friends, colleagues, and lovers, even convincing himself that if he stared long enough, his blurry peripheral vision would bring the world into focus. At thirty, faced with a stalled writing career, a crumbling marriage, and a growing fear of leaving his apartment, he began to wonder if there was a better way.

For decades American submarines have roamed the depths in a dangerous battle for information and advantage in missions known only to a select few. Now, after six years of research, those missions are told in *Blind Man's Bluff*, a magnificent achievement in investigative reporting. It reads like a spy thriller -- except everything in it is true. This is an epic of adventure, ingenuity, courage, and disaster beneath the sea, a story filled with unforgettable characters who engineered daring missions to tap the enemy's underwater communications cables and to shadow Soviet submarines. It is a story of heroes and spies, of bravery and tragedy.

The Cold War was the first major conflict between superpowers in which victory and defeat were unambiguously determined without the firing of a shot. Without the shield of a strong, silent deterrent or the intellectual sword of espionage beneath the sea, that war could not have been won. John P. Craven was a key figure in the Cold War beneath the sea. As chief scientist of the Navy's Special Projects Office, which supervised the Polaris missile system, then later as head of the Deep Submergence Systems Project (DSSP) and the Deep Submergence Rescue Vehicle program (DSRV), both of which engaged in a variety of clandestine undersea projects, he was intimately involved with planning and executing America's submarine-based nuclear deterrence and submarine-based espionage activities during the height of the Cold War. Craven was considered so important by the Soviets that they assigned a full-time KGB agent to spy on him. Some of Craven's highly classified activities have been mentioned in such books as *Blind Man's Bluff*, but now he gives us his own insights into the deadly cat-and-mouse game that U.S. and Soviet forces played deep in the world's oceans. Craven tells riveting stories about the most treacherous years of the Cold War. In 1956 *Nautilus*, the world's first nuclear-powered submarine and the backbone of the Polaris ballistic missile system, was only days or even hours from sinking due to structural damage of unknown origin. Craven led a team of experts to diagnose the structural flaw that could have sent the sub to the bottom of the ocean, taking the Navy's missile program with it. Craven offers insight into the

rivalry between the advocates of deterrence (with whom he sided) and those military men and scientists, such as Edward Teller, who believed that the United States had to prepare to fight and win a nuclear conflict with the Soviet Union. He describes the argument that raged in the Navy over the reasons for the tragic loss of the submarine Thresher, and tells the astonishing story of the hunt for the rogue Soviet sub that became the model for *The Hunt for Red October* -- including the amazing discovery the Navy made when it eventually found the sunken sub. Craven takes readers inside the highly secret DSSP and DSRV programs, both of which offered crucial cover for sophisticated intelligence operations. Both programs performed important salvage operations in addition to their secret espionage activities, notably the recovery of a nuclear bomb off Palomares, Spain. He describes how the Navy's success at deep-sea recovery operations led to the takeover of the entire program by the CIA during the Nixon administration. A compelling tale of intrigue, both within our own government and between the U.S. and Soviet navies, *The Silent War* is an enthralling insider's account of how the submarine service kept the peace during the dangerous days of the Cold War.
