This book is aimed at those owners of Boxsters who want to improve their machines while avoiding thousands of dollars in mechanic’s costs. Clearly and simply written, with straightforward illustrations, this manual offers 101 projects to help you modify, maintain, and enhance your Porsche. Focusing on the 986 and 987 Boxster models, 101 Projects for Your Porsche Boxster presents all the necessary information, associated costs, and pitfalls to avoid when performing a wide array of projects. In a word, it makes owning a Porsche Boxster an unqualified thrill.

Since its introduction in 1975, the BMW 3-series has earned a reputation as one of the world's greatest sports sedans. Unfortunately, it has also proven one of the more expensive to service and maintain. This book is dedicated to the legion of BMW 3-series owners who adore their cars and enjoy restoring, modifying, and maintaining them to perfection; its format allows more of these enthusiasts to get out into the garage and work on their BMWs-and in the process, to save a fortune. Created with the weekend mechanic in mind, this extensively illustrated manual offers 101 projects that will help you modify, maintain, and enhance your BMW 3-series sports sedan. Focusing on the 1984-1999 E30 and E36 models, 101 Performance Projects for Your BMW 3-Series presents all the necessary information, covers all the pitfalls, and assesses all the costs associated with performing an expansive array of weekend projects.

This book constitutes the proceedings of the 16th International Conference on Cooperative Design, Visualization, and Engineering, CDVE 2019, held in Alcudia, Mallorca, Spain, in October 2019. The 26 revised full papers and 6 short papers presented were carefully reviewed and selected from 68 submissions. The achievement, progress and future challenges are reported in areas such as aerospace engineering, remote medical monitoring, automatic machine monitoring, cooperative personal data analytics, mobile banking, remote cooperative art performance management etc. In traditional areas such as architecture, civil engineering and construction, cooperative learning, enterprise management etc. authors also show new findings and new methodologies in their papers. This gives the readers a fresh look of how the CDVE technology is shaping our industry and daily life.

This book promotes an understanding of ageism, discrimination and mistreatment of older adult workers, incorporating an international human rights perspective. The impact of ageism on the mistreatment of older adult workers has not to date been examined in depth through the lens of international human rights instruments, nor has discrimination against older adults in the workplace been framed as a form of elder abuse for research and policy making purposes. This book presents a multi-disciplinary exploration of these themes as they affect work and retirement of older adults. It reflects the view that older people who choose to work into old age should be able to do so in enabling work environments that promote dignity and are free of abuse. The contributing authors come from many disciplines, including law, psychology, social work, business, and international affairs. Many are members of the International Network for the Prevention of Elder Abuse (INPEA), a non-governmental organization with consultative status at the United Nations, and have devoted their professional careers to increase awareness and understanding of elder abuse in order to prevent it. The editors hope that broadening the framework within which elder abuse in the workplace is understood will stimulate further research, policy and program development to address this troubling social problem.
